MUZZY BROTHERS
SEEDS and IMPLEMENTS
POULTRY SUPPLIES
ESTABLISHED 1835

1923

143 MAIN STREET
PATERSON, N. J.

SPECIAL NOTICE

OUR Aim is to sell the Best Seeds Obtainable. We give no warranty, expressed or implied as to description, purity, quality, productiveness, or any other matter of any seeds, bulbs or plants we sell, and we will not in any way be responsible for the crop. If the purchaser does not accept the goods on these terms they are to be returned, and money refunded. **NOT TESTED SEED.** So marked to comply with chapter 228, Laws N. J., 1916

PUMPS

THE 1923 edition of our annual Catalogue of Seeds, Agricultural Implements and Poultry Supplies affords us an opportunity to thank our many friends for the confidence and patronage, covering a period of 88 years. Such loyalty is truly an inspiration to set a high mark for our standard and continue the work to make our best better. It is our purpose to add to the wealth of the community—not to detract. Seeds are cheap or expensive, as measured by their ability to produce profitable crops, and not per cost of pound or bushel. Our efficient laboratory service enables us to determine their viability; and field inspection of the growing crops minimizes the possibility for error or disappointment.

We Make a Specialty of **GRASS SEED MIXTURES**, Including
Central Park Lawn; Extra Mixture Lawn; Shady Lawn
ALSO FOR HAY AND PASTURE

OUR POULTRY SUPPLIES

We are printing the annual list in conjunction with the Seed Catalogue, and offer a comprehensive introductory to this special feature.

*The name "MUZZY" applied to our special formulas represents the superlative. In feed it signifies purity, sound, clean, sweet grain. We do not employ adulterants or by-products, screenings, salvaged stock, or musty and damaged matter. **QUALITY** and the **BEST** spells it another way.*

SPECIAL NOTICE TO MARKET GARDENERS

We sell to Market Gardeners, Truckers and Farmers' Clubs at special wholesale rates, and solicit your inquiries for close prices on round lots.

Some Of Our Leading Specialities In Vegetable Seeds

PEA, WORLD'S RECORD—Much earlier and hardier than Gradus, but pods the same size and quality. The early Pea par excellence.

PEA, LAXTONIAN.—The finest and earliest Dwarf Pea. Tremendous cropper, producing long, dark green pods filled with Peas of exquisite flavour.

BEAN DWARF, "MUZZY STRINGLESS".—Specially suitable for market growers and gardens. Produces pods of medium size, round pod, stringless and of a bright green colour.

LETTUCE, "NEW YORK" or "WONDERFUL".—This is a splendid Lettuce, of large size but yet compact, with crisp solid hearts. The outer colour is a bright medium green, it stands very long and is an excellent variety in every respect.

BRUSSELS SPROUTS.—A very special strain, early. Produces a splendid crop of large, heavy Sprouts of splendid quality.

CABBAGE, "COPENHAGEN" MARKET.—An exceedingly early round-headed variety. Short stemmed and compact with practically no outside leaf. Sown in March it can be cut in July or early August.

LETTUCE, "WHITE COS ROMAINE".—Splendid self-folding variety, grown very largely for the market. It is a rich, rather deep clear green, very crisp, medium in height, and compact in habit. Excellent sort in every respect.

ONION, "AUSTRALIAN BROWN".—Our stock of this variety is well-known and is the result of continuous selection. Mild flavor, early golden.

PARSLEY—PLAIN LEAVES.—Known widely as Italian Parsley. Used for flavoring.

TOMATO, "I. X. L."—Very heavy cropper, producing round fruit of medium size, and very regular in shape. Has done the best in our trials of all the leading varieties. Its vigorous growth enables it to resist disease well. Very early.

TURNIP, "WHITE EGG".—The finest stock of the Early White Stone varieties. Splendid shape, very small tap root and firm flesh.

Novelties

King of Denmark Spinach

It forms large flat tufts or rosettes, making several whorls of leaves and we believe the foliage is the heaviest of all varieties. The leaves mostly are oval of shape, but the older ones (as is the case more or less with all varieties when plants get old) assume the shape of an arrow. They are considerably crumpled or blistered, very fleshy, and of color a fairly dark green; the petiole is medium long.

In earliness it compares with "Victoria," or only slightly later than "Bloomsdale," and it thus is ready to be cut practically as early as any Spinach.

Its greatest merit, however, is found in its keeping quality. In this respect it is supreme. It will stand from two to three weeks longer than the next best long-standing variety.

As will be seen, it is high in all qualities, and in addition excels in two of the most important ones—Richness of foliage and Durability. It is a very valuable new Spinach, due to be quickly appreciated and become a leading one.

Price: Package, 10c; 1 oz., 20c; $\frac{1}{4}$ lb., 40c; 1 lb., \$1.25

Collection of Vegetable Seeds

Only the choicest sorts are put into the assortments, and they are picked out so as to give a continuous supply of vegetables from your garden all season.

The amount charged for these collections is considerably less than you would pay for the individual seeds, on account of the fact that we are able to put them up during the slack winter months.

COLLECTION for small Gardens \$1.00 (Including Postage in the U. S.)

MUZZY BROTHERS'
ANNUAL
Seed Catalogue
FOR 1922

Prices Subject to Change.

It is our endeavor to maintain the prices quoted in this Catalogue throughout the season, but owing to the present very unsettled conditions they are subject to change without notice.

Muzzy Brothers give no warranty, expressed or implied, as to the description, quality, productiveness or any other matter of any seeds, bulbs or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned, not tested seed so marked to comply with Chapter 228, Laws of N. J., 1916.

ARTICHOKE

German, Artichocke; French, Artichaut; Spanish, Albachofa.

Table with 3 columns: Item, Pkt., Oz.
French Globe ... \$0.10 \$1.25

The Seeds should be sown early in the spring, in drills an inch and a half deep, and one foot apart. The next spring transplant to permanent beds, in rows or hills three feet apart and two feet between the plants. Plant in a deep rich, moist loam, and the plants should be protected in winter by a covering of leaves or coarse manure. A bed will continue bearing for several years.

Jerusalem Artichoke, Tubers ... 25 cents each

ASPARAGUS

German, Spargel; French, Asperge; Spanish, Esparrago.

Table with 4 columns: Item, Per oz., 1/4 lb., Per lb.
Columbia, producing pure white shoots .15 .35 1.00
Conover's Colossal .10 .25 .75
Palmetto, a light green variety .10 .25 .75
Giant Argenteuil, large stalks .15 .35 1.00
ROOTS
Per 50 100 1000
Roots Colossal, 2 years 1.00 1.50 12.00
" Palmetto, 2 years 1.00 1.50 12.00
" Columbia, 2 years 1.00 1.50 12.00
" Argenteuil, 2 years 1.00 1.50 12.00

Sow the seeds early in spring, in drills 15 inches apart, and about a dozen to the foot in the drill; keep the soil mellow and free from weeds during the summer, and in the succeeding spring transplant to permanent beds which should be done in the following manner as described by a cultivator of Oyster Bay Asparagus.

Plant on sandy soil. To grow Asparagus in perfection, the soil need not necessarily be richer than it must be to produce a good crop of corn. Some experiments have shown that by heavily manuring the crop cannot be made permanently greater than by moderate dressings. It is not desirable to plant them out very early; more plants will fail to grow than when the planting is deferred until the soil is dry and warm.

In planting for private use; set out in rows two feet apart, and allow twelve inches in the row. Set the plants at least six inches below the surface. For market on a large scale set four feet apart one way and two the other, which will allow the use of a horse and cultivator to keep the weeds under.

BEANS

10 cents Pkt.

German, Gartenbohne; French, Feve de Marais; Spanish, Hava.
English or Broad.

	1 lb.	2 lb.
Broad Windsor	\$0.40	\$0.75
Sword Lond Pod.....	.60	1.10

This class is very hardy and should be planted as soon as the soil is in good state in the spring. Plant four inches apart, and two inches deep in drills four feet apart. To insure well filled pods, pinch off the tops as the lower pods begin to set.

Bountiful, Extra Early. Very prolific and long bearing. Flat green pods, tender and stringless, 1 lb., 30c, 2lb. 55c, 10 lb. 2.50.

Valentine Black, long round, green, solid pod, very early. 1 lb. 30c, 2lb. 55c, 10 lb. \$2.50.

Valentine, Giant Stringless, about seven days later than extra Early Valentine. Slightly curved pod, brittle and stringless; a strong grower and good yielder. 1 lb. 30c; 2 lb. 60c; 10 lb. \$2.50.

Valentine, Early. Productive, tender and of excellent flavor. 1 lb., 30c; 2 lb., 55c; 10 lb. 2.50.

Horticultural Dwarf, Late. Productive, broad, flat stringless pods. 1 lb. 35c; 2 lb. 65c; 10 lb. \$2.50.

Muzzy's Stringless Green Pod, the best stringless bean grown. Ten days to two weeks earlier than the valentine; pods full and fleshy, extremely crisp and absolutely stringless. Very productive. 1 lb. 30c; 2 lb. 60c; 10 lb. \$2.25.

Long Yellow Six-Weeks, early, excellent variety for general crop. 1 lb. 30c; 2 lb. 60c; 10 lb. \$2.25.

Extra Early Refugee—Small to date. Refugee Pods 2 weeks earlier. 1 lb. 25c; 2 lb. 50c; 10 lb. \$2.00.

Refugee or Thousand to One. (Late variety.) The pods are round and full, stringless and of fine quality. 1 lb. 25c; 2 lb. 50c; 10 lb. \$2.00.

DWARF LIMA AND DWARF WHITE BEANS

Burpee's Improved Bush Lima. Beans are large as Large Lima, stout growth, branches vigorously, bearing 50 to 200 large pods well filled with very large beans. 1 lb. 40c; 2 lb. 80c; 10 lb. 3.25.

Fordhook Bush Lima. 1 lb. 40c; 2 lb. 80c; 10 lb. \$3.25.

White Marrowfat, grown for sale in the dry state. 1 lb. 25c; 2 lb. 50c; 10 lb. \$2.00.

Long White Kidney, excellent as a shell bean, green or ripe. 1 lb. 25c; 2 lb. 50c; 10 lb. \$2.00.

DWARF WAX VARIETIES

Sure Crop Stringless Wax—1 lb. 35c; 2 lb. 65c; 10 lb. \$2.50.

Refugee Wax, Stringless, good for early or late. Immense yielder. 1 lb. 30c; 2 lb. 60c; 5 lb. \$1.75.

Golden Eyed Wax, very early, prolific, free from rust. 1 lb. 30c; 2 lb. 60c; 10 lb. \$2.25.

Round Pod Kidney Wax, same as Wardell's, only round pods. 1 lb. 30c; 2 lb. 60c; 10 lb. 2.25.

Wardell's Kidney Wax, extra early, long flat pods, very productive. 1 lb. 35c; 2 lb. 65c; 10 lb. \$2.50.

BEANS—Dwarf Wax Varieties, Continued

	1 lb.	2 lb.	10 lb.
Curries Rust Proof , very early and prolific. The pods are long, full, stringless; of very fine quality25	.50	\$2.00
Davis' White Wax , beans pure white; pods yellow, flat, tender, rich30	.60	\$2.25
Golden Wax . This valuable variety is about ten days earlier than the black wax pods, large, long semi-round, brittle, stringless Blossoming time sends up a tendril a foot longer than vein which drops off.	.30	.60	\$2.25
Hodson Wax , very large, tender, pods stringless, very productive30	.60	\$2.25

BEANS, Pole or Running Varieties

Challenger Lima . Potato variety, five and six in a pod30	.60	\$2.50
King of Garden Lima . Vigorous in growth and immensely productive, pods large, numerous and well filled and beans of an enormous size. Generally grown for main crop30	.60	\$2.50
New Early Jersey . Very early30	.60	\$2.50
Large White Lima . A greatly esteemed variety30	.60	\$2.50
Kentucky Wonder , or Homestead Extra Early . Pods long, tender and good' flavor, very productive30	.60	\$2.50
Dutch Case Knife . A very productive variety, one of the earliest30	.60	\$2.50
Horticultural or Speckled Cranberry . A popular variety for private use, equally serviceable in the green state or when shelled35	.65	\$2.75
Scarlet Runner . Beautiful scarlet flowers; for ornamental and table use40	.80	\$3.50
Early Golden Cluster . Bright yellow pods, stringless, in clusters..	.40	.80	\$3.25
Yard Long, French . Pods sometimes grow from 2 to 3 ft. long, are very slender like a pipe stem; should be grown on pea bush85		

Sow Bush sorts in drills about two feet apart, and drop the beans about three inches apart in the drill, cover two inches or less for a succession, sow at intervals of two weeks. Lima beans should not be planted until settled weather; make rich hills, four feet apart each way set a pole eight or ten feet high in each; press the beans into the soil eye down, six or eight to each pole, and when they are well up, thin out to four.

A quart of Limas is sufficient for 75 to 80 hills, and a quart of Bush Beans will sow a row 100 feet long.

BEETS

Pkt. 5 cents

German, Runkelrub; French, Bourrache;
Spanish, Remolacha.

Detroit Dark Red. A splendid beet for market or home use, of a deep color, tender and of delicate flavor.

Oz., 15c; $\frac{1}{4}$ lb., 30c; 1 lb., \$1.00

Dark Red Egyptian Crosby's. The earliest beet in cultivation, color deep crimson; of excellent quality.

Oz., 15c; $\frac{1}{4}$ lb., 30c; 1 lb., \$1.00.

DETROIT DARK RED BEET

BEETS—Continued

	Per oz.	¼ lb.	Per lb.
Extra Early Eclipse. Very early, good size.....15	.30
Early Flat Bassano. Chiefly valuable for its earliness			
Early Blood Turnip. Standard early sort, an excellent			
Edmands. Market garden variety, uniform shape, dark			
Dewing's Blood Turnip. Of fine form and flavor			
Long Smooth Blood Red. An excellent late variety	{ See page 28 }	.15	.35
Swiss Chard. Used for its leaves, which are cooked as Spinach			
Swiss Chard Lucullus			
			\$1.00
			\$1.25

MANGEL-WURZEL AND SUGAR

Varieties used for feeding stock. Sow 6 lbs. per acre.

	1 oz.	¼ lb.	1 lb.
Mammoth Red Mangel-Wurzel. Producing roots of mammoth size, very regular, and with a small top.....	.10	.20	.65
Yellow Ovid Mangel-Wurzel. Very productive.....	.10	.20	.70
Long Yellow Mangel-Wurzel. Good for general crop10	.20	.65
Golden Tankard Mangel-Wurzel. A new and very valuable variety of fine form and sweet flavor, bright yellow in color, when cut it shows interior ring, similar to most varieties of garden beet....	.10	.20	.70
White Silesian Sugar Beet. Extensively grown for feeding stock and manufacture of sugar10	.20	.70
Wilmorin's Improved Sugar Beet. An improved variety10	.20	.70
Lane's Improved Sugar Beet. Improved variety of the French Sugar Beet, obtained by careful selection in this country10	.20	.70

A rich, deep open soil is the best suited to the culture of Beets. Fresh manure is undesirable, but land that has been well manured the previous year is highly suitable. For an early supply sow in the spring as soon as the ground becomes fit to work, in drills about one foot apart and two inches deep. For main crop sow the first week in May, and for winter use sow in June. When the plants have obtained three or four leaves, thin out, so that they may stand eight or nine inches apart. Keep free from weeds by hand weeding and hoeing. Those intended for winter use may be taken up in October, and stored in dry sand in the cellar or outhouse. Before storing, leaves and fibers must be cut off, but care must be taken not to bruise the main root.

BORAGE

10 cents Pkt.

German, Borritsch; French, Bourrache; Spanish, Berraja.

	Per oz.	¼ lb.	lb.
Borage, used as a pot herb; also as a salad, or can be boiled, and also for garnishing, but chiefly required for claret cups and other cool- ing drinks. Bees are very partial to the flower20	.80	\$3.00

BROCCOLI

10 cents. Pkt.

German, Spragel Kohl; French, Chou Brocoli; Spanish, Broculi.

	Per oz.	¼ lb.
Early White, heads medium size, compact, creamy white color, most cer- tain to head	\$0.50	\$1.50
Purple Cape, differing from the preceding color, greenish purple	\$0.30	\$1.00
White Cape	\$0.50	\$1.50
Mammoth White	\$0.50	\$1.50

A favorite European vegetable, nearly allied to the Cauliflower, but more hardy and surer to head; the seeds should be sown in this district in the early part of May and transplanted in June; farther south the sowing should be delayed until June or July; and the transplanting accordingly from August to October. In parts of the country where the thermometer does not fall below 20 or 30 degrees, Broccoli may be had in perfection from November until March. It succeeds best in a moist and rather cool atmosphere.

BRUSSELS SPROUTS

10 cents Pkt.

German, Sprossen-Kohl; French, Chou de Bruxelles; Spanish, Breza de Brussels.

Dalkeith Dwarf Improved, a variety producing compact sprouts of excellent quality. Pkt. 10c; Oz. 25c; $\frac{1}{4}$ lb. .85c.

A tender, delicious vegetable. The plant grows two or three feet high, and produces from the sides of the stalks numerous little sprouts, one or two inches in diameter, resembling cabbage. The leaves which look like a Savoy should be broken down in the fall, to give the little cabbages room to grow. They are very tender and sweet after early frosts. Sow early in hot-beds, or in seed-beds in May transplant and cultivate the cabbage.

CABBAGE

10 cents Package, except quoted otherwise.

German, Kopfkohl; French, Chou; Spanish, Berza de Pepollo.

1 oz. $\frac{1}{4}$ lb. 1 lb.**COPENHAGEN MARKET****Copenhagen Market.**

The finest, large, round-headed, early Cabbage; very solid and of fine quality; short-stemmed.

.35 1.15 4.00

Enkhuizen Glory.

Large, early, white, solid, ball shaped heads

.25 .85 3.00

Early Flat Dutch. This is one of the best early cabbages in cultivation

.25 .75 2.50

Early Summer. A valuable early sort resembling the Early Flat Dutch

.25 .75 2.50

Early Winnigstadt. Heads large, one of the best for general use

.25 .75 2.50

Henderson's Succession. A second early or late variety, a sure header; seeds sown in March produce large heads in June

.25 .75 2.50

Muzzy Extra Amagar Danish Ball-Head. Large, round, solid, sweet and crisp, sure header

.25 .85 3.00

Large Late Drumhead. An excellent fall and winter variety, grows to a large size

.25 .75 2.50

Larfie Late Flat Dutch. The most popular variety for late cultivation

.25 .75 2.50

Red Stone Head. Used almost exclusively for pickling

.40 1.40 4.50

Drumhead Savoy (American). The largest heading sort, of excellent flavor ...

.30 1.00 3.50

Drumhead Savoy (Ulm). Very early, popular sort

.25 .80 2.75

Chinese (Pe Tsai)

.45 1.65 5.50

For very early use plant in the autumn from 10th to 25th September, in a seed bed, and protect in cold frames during the winter, being careful to set them down to the first leaf. Transplant in the following spring, as the soil will admit. For autumn and winter use, plant in seed-bed in May and early part of June, and when six inches high transplant into rich soil, two feet apart each way for the early varieties, and three by two and a half feet for the large winter varieties. To secure the best results, the soil should not be too dry, but should be thoroughly enriched, and the crop should be hoed at least once in ten days. Sow in hot bed early in spring, seed of the early kind for a second crop; also the late varieties for winter use.

CARROT

All 5 cents Package

Except Quoted Otherwise.

German, Mochern; French, Carotte.

The Carrot, like other root crops, delights in a sandy loam, deeply tilled. It should never be sown on newly manured ground as forked roots are sure to be the result. It is best to sow on ground that has been well manured the previous year for some other crop such as Celery, Potatoes, Onions or Peas, but avoid such crop as Cabbage and Turnips, or any of the tap rooted sections. For early or main crops sow the latter part of April; for later crops, they may be sown any time until the beginning of June. Sow in rows about 15 inches apart and half an inch deep, thinning out to three or four inches between the plants.

Early French Forcing. The earliest variety, valuable for forcing; root small and of fine flavor, oz., 15c; ¼ lb., 35c; 1 lb., \$1.25.

Early Scarlet Horn. Old and favorite sort, much esteemed for early summer, oz., 15c; ¼ lb., 35c; 1 lb., \$1.10.

Half Long Danvers. A variety intermediate in size and period of maturity between the preceeding and the Dond Orange, oz., 15c ¼ lb., 35c; 1 lb. \$1.00.

Half Long Stump Rooted Chantenay. Like Nantes, broader shoulder, oz., 15c; ¼ lb., 35c; 1 lb., \$1.10.

Half Long Rubicon. Finest Carrot in existence. Oz. 20c; ¼ lb. 60c; 1 lb. \$2.00.

Half Long Stump Guarande or Oxheart.....

Half Long Stump Nantes

Long Orange Improved. Roots of large size, equally adapted for garden or farm culture

Large White Belgian. Grown almost exclusively for stock

CAULIFLOWER

German, Blumen-Kohl; French, Chou-fleur; Spanish, Coliflor.

Extra Early Paris. This is one of the earliest and best varieties, heads large, white and compact, of fine quality. Pkg. 10c; oz., 80c; ¼-lb., \$2.50.

Large Early Snowball. Best for forcing under glass or open ground. Pkg. 25c; ¼-oz., 75c; ½-oz., \$1.35; 1-oz., \$2.50.

Early Dwarf Erfurt. Best for forcing. Pkt., 25c; ¼-oz., 70c; ½-oz., \$1.25; 1 oz., \$2.25.

Early London. Pkt., 15c; 1-oz., \$1.00; ¼ lb., \$3.00.

Denmark, Special Large Late. Very fine variety, large white, compact heads, the space necessary between plants is greater than other varieties. Pkt. 25c; ¼ oz. 1.25; ½ oz. 2.00; 1 oz. 3.50.

EARLY SNOW BALL CAULIFLOWER

CAULIFLOWER—Continued

Cauliflower delights in rich, moist soil and in dry seasons should be abundantly watered. The seeds may be sown in September and wintered over in the same manner as described for early cabbage. Where this is not practicable, it may be had nearly as well by sowing the seed in the hot-bed in January or February and transplanting the plants at two or three inches apart in boxes, or in the soil of another hot-bed, until such time as they are safe to be planted in the open ground, which in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off, they are seldom injured by being planted out too early.

CELERY

10 cents Package, except quoted otherwise.

German, Celeri; French, Celeri; Spanish, Apih.

	Oz.	¼ lb.	lb.
Golden Self-Blanching. American Strain. Very choice. Standard early variety Pkt. 10 cents	.40	1.15	4.00

Celery Seed for Flavoring.10	.20	.65

CELERIAC

10 cents Pkt.

TURNIP ROOTED CELERY

German, Knob-Celeri;
French, Celeri Rave.

Giant Prague. For soups, etc. When sliced and cooked makes good winter salad. Oz., 20c; ¼ lb., 60c; lb., 2.00.

The seeds may be sown in the open ground in April, as soon as the ground can be nicely worked. Sow about half an inch deep, and be careful to firmly press the soil over the seed; this should be done by treading over the rows with the feet after sowing; this prevents the air drying up the seed, which thereby loses its vitality and fails to germinate. Many valuable crops are annually lost by inattention to this important particular. After the seed is up, keep carefully clear of weeds until the time of planting June and July; the crops may be shorn off once or twice before planting; this makes them "stocky" and they suffer less in being transplanted. After the ground has been well prepared, plant in rows from three to four feet apart, according to the variety, setting the plants about six inches apart and pressing the soil firmly about the roots.

CHERVIL

Package 10 Cents

German, Bisen'auch; French, Cerfeuil;
Spanish, Cerafolio.

Curled Per. oz., .25

The young leaves are used in soups and salads. Sow thinly in May, in drills of an inch deep, one foot apart.

CELERY

CHICORY

Pkt. 10 Cents.

German, Chicorie; French, Chicoree Saur; Spanish, Escarola.

Per oz. ¼ lb.

Common. This variety produces the "Barbe de Capucin," a salad much used in France. Sown in June the roots are transplanted in autumn into sand in a cellar; the shoots of which will come up soon from the "Barbe de Capucin"

	.35	1.25

Early Fortune. Very early and productive. Uniform size. Good shipper	.15	.40	1.25
Forhook Pickling. Prolific, medium size, skin thick	.15	.40	1.25
Davis Perfect. For forcing or outdoors, long and straight, valuable for slicing	.15	.45	1.40
Cool and Crisp. Very prolific; good for pickling and productive	.15	.40	1.25
Japanese Climbing. Can be trained on trellis, or grown on the ground. Skin smooth, dark green; flesh pure white, crisp and mild flavor	.15	.45	1.40
Nichols Medium Green. A valuable and handsome variety, in shape between White Spine and Long Green, an excellent sort for pickles and useful for forcing. Very prolific, fruit straight and smooth, color dark green; fresh, tender and crisp	.15	.40	1.25
Improved Early White Spine. The best table variety; grows uniformly straight and smooth; dark green; and tender and excellent flavor	.15	.40	1.25
Peerless White Spine. A new variety of the preceding; average length 10 inches; full at both ends; deep green, holding color until mature	.15	.40	1.25
Arlington White Spine. Fine either for forcing or for outdoors	.15	.40	1.25
Early Green Cluster. A short, prickly, slender variety, bearing in clusters near the root. It is a great bearer	.15	.40	1.25
Early Short Green. The standard for pickling, medium size, straight and handsome. It makes a beautiful pickle that keeps well	.15	.45	1.40
Long Green. A very excellent variety; a good bearer; about a foot in length, rather pointed at both ends; dark green, firm and crisp	.15	.40	1.25
Green Prolific Pickling. Very prolific; and said by those who have tested it equally desirable as a market Cucumber	.15	.40	1.25
West Indian Gherkin or Burr. A very small oval shaped prickly variety. It is grown exclusively for pickling, and should always be picked when young and tender	.20	.60	2.00

Cucumbers succeed best in warm, moist, rich loamy ground. They should not be planted in the open air until there is a prospect of settled warm weather. Plant in hills about four feet apart each way. The hills should be previously prepared by mixing thoroughly with the soil in each a shovelful of well rotted manure. When all danger from insects is past, thin out the plants, leaving three or four of the strongest to each hill. **English Frame Cucumber**—Per pkt., 25c. **Improved Sion and True, Swan Neck, Blue Gown.**

These varieties are for growing in hot-beds, or in hot-houses, particularly constructed for forcing, so that a supply can be furnished during the winter months, at which time the prices are very remunerative. Sow seeds in November, December and January, according to the time they are wanted for market.

DANDELION

15 Cents Pkt.

German, Pardelblume; French, Pissenlit; Spanish Armagon.

	Per oz.	¼ lb.	lb.
Best French45	\$1.50	\$5.00

The Dandelion is much used for spring salads and resembles Endive. Sow the seed in May or June in drills half an inch deep and 12 inches apart. The plants will be ready for use the following spring.

Early Dwarf Purple. Medium size.....	.45	1.25
Black Pekin. A fine variety, bearing large round, deep, purple fruits, fine, grand and of superior quality45	1.35

The Egg Plant is a tender vegetable, and must not be planted out until the weather is warm and settled. Sow early in spring in hot-beds, or if they are not convenient, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or in boxes in the house. Plant out early in June from two to three feet apart.

Moss Curled Early Summer.

Used for salads as winter varieties

.15	.40	1.25
-----	-----	------

Witloff or French

Endive. New 1 oz., .25; ¼ lb .75; 1 lb., 2.00.

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July, from which plantations are formed at one foot apart each way in August and September. It requires no special soil or manure, and after planting, is kept clear of weeds until the plant has attained its full size, when the process of blanching begins. This is affected by covering up the plants as they grow, with slats or boards, which serves the purpose of excluding the air and light.

NEW YORK EGG PLANT.

KALE

Pkt. 5 Cents, except where noted.

German, Blatter-Kohl; French, Chou Vert; Spanish, Breton.

Everbearing—See Novelties—50c pkt.
Oz. $\frac{1}{4}$ lb. 1b.

Siberian German Green or "Sproute." This variety is extensively used for early greens for which it is sown in the fall in rows one foot apart and treated in the same manner as Spinach; it is ready for use in early spring. Sowing can also be made in spring.....15 .35 1.10

Dwarf Green Curled Scotch. Beautifully fringed dwarf growing kind, with bright green leaves, 10c pkt... .15 .40 1.25

Tall Green Curled Scotch. Tall growing, very hardy variety, leaves a bright green, beautiful curled. 10c pkt.15 .40 1.25

Kale may be grown in almost any soil but the richer it is the more abundant the product. Sow early in the spring, in prepared beds, covering the seeds thinly and evenly; transplant in June and treat in the same manner as for cabbage. Of all the cabbage tribe this is the most tender and delicate and would be much more extensively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

KALE

KOHL-RABI

KOHL-RABI

Pkt. 10 Cents.

German, Kohl-Rabi; French, Chou Rave; Spanish, Colinabo.

	Per oz.	$\frac{1}{4}$ lb.	1b.
Early White Vienna. Flesh white and tender; best market sort; good for table use20	.75	2.50
Early Purple Vienna. Differing from the above in color, which is of a bluish purple20	.75	2.50
Large White or Green. Large ball, not so fine, but more productive...	.25	.80	3.00

Kohl-Rabi or Turnip stemmed cabbage, is a vegetable that is not so much cultivated as it deserves to be. The stem above the ground swells into a bulb, somewhat resembling a turnip: this again is covered with leaves. The edible part is the bulb, which is dressed and served like turnip, is very delicate and tender when young. It is very hardy, withstands severe drought, and is a good keeper. Cultivate the same as cabbage, but in hoeing be careful not to throw dirt into the heart of the plant, or the bulb cannot form.

LEEK

Pkt. 5 Cents.

German, Lauch; French, Poireau;
Spanish, Puerro.

Large American Flag.	oz.	¼ lb.	lb.
The kind mostly grown for market20	.60	2.00

Large Careten. A large growing French varie- ty of excellent quality..	.20	.60	2.00
---	-----	-----	------

Large Rouen. Very large and fine20	.60	2.00
--	-----	-----	------

The Leek is very hardy and easily cultivated; it succeeds best in a light, but well enriched soil. Sow as early in the spring as practical, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible; that the neck, being covered, may be blanched. If fine leeks are desired, the ground can hardly be made too rich.

LEEK.

LETTUCE

Pkt. 5 Cents.

German, Laitick; French, Laitue; Spanish, Lechuga.

For early crop, the seed may be sown in the open ground in September, and transplanted to cold-frames as soon as large enough to handle. In dry, sheltered spots, by covering up with leaves late in the season. Lettuce plants may be saved over Winter without glass covering. The plants for setting out in Spring are also sown in coldframes in February, and in hotbeds in March, and by careful covering up at night make plants to set out in April.

ROMAINE OR COS VARIETIES

Bath Cos. Pale green tinged with brown. Early.15	.45	1.50
Trianon Cos. The best of the Cos variety.....	.15	.40	1.25
White Paris Cos (Romaine). Sow early; tie up to blanch15	.40	1.25

Lettuce is the most popular of all salads. Boiled, is quite equal to Spinach; and it is also sometimes used in soups. It is easy of cultivation, but likes a good rich soil. For early use, sow Simpson and Tennis Ball under glass in February and March and transplant as soon as the ground can be worked. Later sowings may be made in the open ground for successions as long as the weather permits; thin out well or the plants will be weak, and set in rows two feet apart and eight inches between the plants. The best early plants are obtained by sowing in the open ground in September, and transplanting to cold frames the latter part of October, being wintered over in the same manner as early Cabbage. Lettuce requires good ground and abundant moisture.

MAY KING LETTUCE

LETTUCE—Continued

German, Laitick; French, Laitue; Spanish, Lechuga.

Cassaba. Good water melon, sweet melting—must be fully ripe. Pkt. 10c35	1.25	4.00
Rocky Ford. Very sweet; spicy flavored, small and oblong, most popular sort20	.50	1.75

HONEY DEW MELON.

Melons thrive best in a moderately enriched live soil; the hills should be six feet apart each way. Previous to planting incorporate well with the soil in each hill a couple of shovelfuls of thoroughly rotted manure; plant twelve or fifteen seeds in each hill in May, and when well up, thin out three or four of the most promising. Pinch off the leading shoots as the growth becomes too luxuriant, and if the fruit sets too numerous thin out when young, which will increase the size of those remaining, and cause them to ripen quicker.

MELON, WATER

Package 5 Cents

German, Wassermelone; French, Melon d'Eau; Spanish, Zaudia.

	Per oz.	½ lb.	lb.

Per oz.	¼-lb.	lb.
.15	.35	1.00

Plant in hills directed for Muskmelons, giving them more room, as their vines extend much farther. If they are wanted of a large size, three or four melons to each plant will be sufficient, and when only one is allowed to grow from each plant they will grow to an immense size.

MUSHROOMS

German, Chimpignoubrut; French, Champignon; Spanish, Hongo
Imported English Spawn Per brick, 25c; 10 bricks, \$2.50; 20 bricks, \$4.75
American Spawn Bricks Per brick, 35c; 10 bricks, \$2.75; 20 bricks, \$5.00

Mushrooms should be grown either in a building especially erected for the purpose or some shed, stable or cellar, where the temperature of from 40 to 60 degrees can be kept up in winter. To every barrow load of fresh horse droppings add about the same weight of loam or soil of any kind that has not been manured. Turn the heap every day, so that it is not allowed to heat violently, until you have quantity enough to form a bed of dimensions required. Be careful that your heap is under cover, so that it cannot possibly get wet. The most convenient size is from three to four feet long and eight inches deep.

MUSHROOMS.

Prepare the mixture of loam and manure, making the bed in layers and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way into which put pieces of spawn two or three inches in diameter; fill up the holes with the compact and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Now spread a layer of fresh soil

over the heap to the depth of two inches, firm it down moderately and cover with three or four inches of hay or straw. Examine the bed often to see that it does not get dry. When water is given it should be at a temperature of about 100 degrees.

MUSTARD

5 Cents Pkt.

German, Snef; French, Moutarde; Spanish, Mostaga.

White London. Best for salads \$0.10 \$0.25 \$0.75
Black. Used for cooking and salad10 .30 1.00

Mustard in the green state is a refreshing salad, mixed with Cress, Lettuce, or other salad plants. It is necessary to make frequent sowing of it, as it should be cut and used in a very young state, even before the first rough leaf appears. The seed should be sown thickly in light soil the surface of which should be made very smooth. The seed should be pressed into the soil with the back of a clean spade.

NASTURTIIUM

Package 5 Cents

German, Nastrutian; French, Capucine; Spanish, Maranuela.

	Per oz	¼ lb.	lb.
Tall Scarlet	\$0.20		
Tall Yellow	\$0.20		
Tall Nasturtium, Mixed.....	.15	.40	1.50
Dwarf Nasturtium, Mixed15	.45	1.50

Cultivate both for use and ornament; the green seed pods preserved in vinegar make an excellent pickle. The young leaves are also useful in salads. Its scarlet and orange-colored flowers which appear freely all summer, add a charm to the garden.

ONION

Package 10 Cents

German, Zweibel; French, Oignon; Spanish, Cebolia.

Yellow Globe Prize Taker, 90 days.

	Per oz.	¼ lb.	lb.
Australian Brown, mild flavor, heavy golden early25	.75	2.00
Early Red Flat. About ten days earlier than the Large Red, and not quite so large.....	.25	.75	2.00

Prizetaker. Grows uniform in shape; is of immense size, measuring from 12 to 16 inches in circumference, while under special cultivation specimen bulbs have been raised to weigh from 2 to 3 pounds each; its pure white flesh is fine-grained, mild and delicate in flavor

.25 .75 2.00

The onion thrives best in a rather strong, deep, rich loamy soil, and unlike most vegetables succeeds well when cultivated on the same ground for successive years. The ground should be deeply trenched and manured the previous autumn, and laid up in ridges during the winter to soften. As early in the spring as the ground is in working order, commence operations by leveling the ground with a rake, and tread firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil and press down with the back of a spade or a light roller. When the young plants are strong enough, thin gradually so that they stand three or four inches apart.

	Per oz.	¼ lb.	lb.
Improved Dwarf White. Long slender pods, very productive, only 14 inches high	\$0.10	\$0.25	\$0.75
Dwarf Green. Early and productive10	.25	.75
Long Green. Fine long pods, very good10	.25	.75

The pods in a young state are used in soups, sauces and stews, and are very wholesome and nutritious. It is the easiest culture and grows freely, bearing abundantly when grown in ordinary garden soil. It is sown at the usual time of all tender vegetables in drills two inches deep, setting the plants from two to three feet apart.

PARSNIPS

Package 5 Cents

German, Pastinake; French, Panais; Spanish, Chirivia

	Per oz.	¼ lb.	lb.
Guernsey or Cup. Leading variety	\$0.15	\$0.25	\$0.85
Long Smooth or Hollow Crown.			
Long roots15	.25	.85
Early Round15	.25	.85

They succeed best in a deep rich soil that has been well manured the previous season, as manure freshly applied tends to the production of forked and ill-shaped roots. Sow the seed early in spring in drills eighteen inches apart in the garden, and three feet apart in the field, thin the plants to six inches in the drill.

PARSLEY

Package 5 Cents

	Per oz.	¼ lb.	lb.
Extra Double Curled. A fine dwarf variety excellent for garnishing	\$0.15	\$0.30	\$0.90
Moss Curled. The most beautiful form of parsley, resembling crested fern or moss in its growth	\$0.15	\$0.30	\$0.90
Plain Leaves. Hardier than the curled variety10	.25	.85
Hamburg, or Rooted. Edible roots15	.35	1.10

Should be sown very early in the spring in beds or in lines, and the seeds which are somewhat slow to vegetate should be previously soaked 24 hours in warm water. The soil should be kept free from weeds, which should be extracted by the hand, so as to avoid disturbance of the seed when about to germinate. As soon as the plants are large enough they should be thinned out so as to stand five or six inches apart.

PEAS

Package 10 Cents

German, Erbsen; French, Pois; Spanish Guisantes.

Extra Early Varieties

	lb.	2 lb.	5 lb.
*World's Record. Among early main-crop Peas of medium height, Gradus, or Prosperity, takes first place; happily named, indeed, on account of its high yield and superb flavor. In World's Record these points are more than maintained; the yield is as high and the quality, if anything, is enhanced. The great point in favor of the new sort is its earliness, the period from seed to maturity being less by a week than the standard Gradus35	.65	1.50
Laxtonian. Dwarf early wrinkled. Very prolific, large pods, height 1½ ft.35	.65	1.50
Gradus or Prosperity. Earliest wrinkled Pea grown. Can be sown early as the round sorts. Large peas and pods, splendid flavor. Requires no sticks, reaching only 36 inches in ordinary good soil. Height, 3 feet....	.35	.65	1.50
Thomas Laxton. A cross between Gradus and one of the extra early sorts. Ripens within a day or two of the earliest round varieties; very productive. The pods are large and contain 7 or 8 large, wrinkled Peas of the finest flavor35	.65	1.50

Alaska. Very early and retain their color well, height 2½ feet	.25	.50	1.15
First and Best. One of the best extra early Peas. An improved strain of the Extra Early Market, height 2½ feet.....	.25	.50	1.15
Little Gem. A dwarf green wrinkled Market, very prolific, of superior flavor, and a first early, 1½ feet30	.60	1.40
Premium Gem. A fine flavored dwarf, wrinkled variety; good cropper and fine quality. Height, 18 inches30	.60	1.40

SECOND EARLY VARIETIES.

Everbearing. Good size pea, long pods, height 2½ feet....	.30	.60	1.40
McLean's Advancer... Early green wrinkled varieties, delicious flavor, height 2½ feet..	.25	.50	1.15
Pride of the Market. Very large pods, green peas, sow thin, height 2 feet35	.65	1.50
Abundance, 18 inches high, 6 to 8 peas in pod, large and wrinkled35	.65	1.50
Dwarf Telephone. Same quality and productiveness as Telephone excepting the vines grow 2 feet high, pods are large and filled with immense peas of excellent flavor and sweet35	.60	1.50

GENERAL CROP.

Champion of England. A popular wrinkled variety of delicious flavor, profuse bearer. Peas are very large, tender, height 5 feet30	.60	1.40
Telephone. This is the best pea for general crop, both for home and market use. Immediately productive and of finest quality. Vines very strong, averaging 18 to 20 large pods per stalk, 4 feet.35	.65	1.50
Mammoth Gray Sugar. Edible pods, a fine flavored variety; can be used in green state like string beans. Height 5 feet.45	.90	2.25
Dwarf, Sugar. Edible pods.....	.35	.70	1.75

Peas come earlier to maturity in light soil. For general crop a deep rich loam, or strong loam inclining to clay is best. For early crops decomposed leaves or leaf mould should be used, or if the soil is very poor, strong manure may be employed. For general crop a good dressing should be applied, and for the dwarf growing kinds the soil can hardly be too rich. When grown as a market crop, peas are not staked, but sown in single rows, two or three inches deep, two or three feet apart according to the variety. When grown in small quantities for private use

PEAS—Continued.

they are sown in double rows six or eight inches apart, and the rows three feet apart, the tall varieties staked up by brush. For an early crop, sow as soon as the ground can be worked, and make repeated sowings every two weeks for succession. A quart is sufficient for a row of about eighty feet

PEPPER

Package 10 Cents

German, Pfeffer; French. Piment; Spanish, Pimento.

PEPPERS.

	Per oz.
Ruby King. Very large; bright red.....	\$0.50
Sweet Spanish. One of the largest. Best for salads, mild50
Large Bell or Bull Nose. An early variety of mild flavor50
Sweet Mountain or Mammoth. Of large size, best for mangoes50
Chinese Giant. Double the size of Ruby King. This is the largest and finest mild	
Red Pepper. Flesh is thick and unusually mild. Productive bearer75
Long Red Cayenne. Used for Pepper sauces; very pungent50
Chili. Very piquant and prolific, fruit conical, bright scarlet50
Golden Dawn Mango. This is a remarkably prolific Pepper of the Bell class of a mag-	
nificent golden color50
Hot Mango Pepper. Very Hot, best for Pepper Sauce and Pickling50

The Pepper or Capsicum is valuable for its seasoning qualities, as well as for pickling. Sow early in heat and transplant when the weather is warm and settled, or sow in warm situation in the garden about the middle of May. Plants should be set a foot and a half apart.

POTATOES

German, Kartoffel; French, Pomme de Terre; Spanish, Petata.

Houlton Stirling (see novelties).	
Houlton Hebron. White skin, the most popular variety in cultivation	
Houlton Rose. The standard variety.....	
Houlton Early Queen. Early and productive.....	
Houlton Green Mountain. Late variety, good keeper, white and mealy	
Houlton Irish Cobbler. Very early, round white.....	
Houlton Boree. Extra early production, white flesh.....	
Houlton Bagley	
Houlton Delaware	

Prices on
application.

POTATOES—Continued

HOULTON MAINE POTATOES.

PUMPKIN

Package 5 Cents

German, Kuerbis; French, Courge;
Spanish, Calabaz a Tetanera.

CHEESE PUMPKIN.

	Per oz.	¼-lb.	lb.
Morse's Marrow	\$0.20	\$0.55	\$1.75
Calhoun. Flesh wonderfully thick, fine grained.....	.15	.50	1.75
Large Cheese. The best variety, hard and productive15	.30	.95
Connecticut Field. Very productive, largely grown for feeding stock, 20c per quart, \$3.00 per bushel....	.10	.30	1.00
Mammoth King. Grows to an immense size20	.50	1.50
Early Sugar. Fruits medium size, of excellent keeping quality. Flesh very sweet15	.35	1.25
Cushaw. Salmon color, crooked neck20	.60	1.65
Tennessee Sweet Potato. Bell shaped, thick, white flesh, nothing finer for pies20	.50	1.60

These are usually in fields of Corn or Potatoes, but may be profitably raised in fields by themselves. Sow in May; in hills eight feet apart.

RHUBARB

Package 5 Cents

German, Rabarber; French, Rhubarbe; Spanish, Ruibarbo.

	Per oz.	¼-lb.
Linnaeus. Early, large and tender20	.60
Victoria. Very large, later than Linnaeus.....	.20	.60
Roots (Victoria)		15c each

Sow early in spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall or following Spring, transplant into deep, rich soil, about three feet apart each way.

RADISH

5 Cents Package

German, Retting; French, Radis; Spanish, Robanitos.			
Siberian.—15c package.	Per oz.	¼-lb.	lb.
Early Scarlet Turnip. The standard variety, of quick growth, mild and crisp when young	\$0.15	\$0.30	\$0.90
Early Scarlet Turnip. Forcing variety, maturing in three weeks	.15	.30	.90
Early Scarlet Turnip. White tipped. A beautiful new early kind, round in shape; color scarlet, tipped with white, a favorite for market gardeners	.15	.30	.90
Early Scarlet Turnip. White tip, forcing	.15	.45	1.35
Olive Shape Deep Scarlet	.15	.30	.90
French Breakfast. Of quick growth, very mild and tender, of oval form; color scarlet, tipped with white	.15	.40	1.25
Long Scarlet. One of the leading market kinds.	.10	.25	.80
Rose China Winter. Flesh firm and piquant; excellent for winter use	.15	.30	.90
White Summer Turnip. A summer variety of mild flavor	.15	.45	1.15
Yellow Summer Turnip. Grows to a large size.	.15	.30	.90

Black Spanish Winter. Long, one of the hardiest and best for winter use	.15	.30	.90
Half Long Black Spanish	.15	.45	1.15
Black Spanish Winter. Round,	.15	.30	.90
White Strasburg. Very large, German sort	.15	.25	.80
White Vienna or Lady Finger. Crisp and tender in summer,	.15	.25	.80
Icicle. Long, pure white, suitable for forcing	.15	.30	.85

best in high rich soil. For a successful supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown on a mild hotbed in February. The winter varieties may be sown from the latter part of July to the middle of September.

SORREL

10 Cents Package

Used for Salad—Has an acid flavor—or it may be cooked same as spinach	oz.	¼-lb.
Large French	.25	.75

SPINACH

5 Cents Package

German, Spinat; French, Epinard; Spanish, Espinaca
Special price on lots of 10 to 25 lbs.

	Oz.	¼-lb.	1-lb.
Siberian.—New—(See novelties.)

Flander's Round Leaved. The variety commonly grown, good for spring or fall sowing	.10	.20	.50
Large Viroflay. A new variety, with leaves much larger and thicker than the old variety	.10	.20	.50

SPINACH—Continued

	Per oz.	¼-lb.	lb.
Victoria, New. Dark green color, sow early.....	\$0.10	\$0.20	\$0.50
Bloomsdale Savoy Leaved. A large, curled, thick leaved variety, the market gardener's favorite.....	.15	.25	.60
Prickly. Prickly seeded, with triangular arrow-shaped leaves10	.20	.50
New Zealand. Produces leaves in great abundance throughout the summer, should be raised in heat and transplanted three feet apart each way into light rich soil15	.35	1.15
Denmark Spinach. (See novelties).			

Sow in fall for spring use, in drills a foot apart, thinning out the plants to three inches apart in the rows. Spinach is very hardy and does not require protection except in very exposed places, where a covering of straw or leaves is useful. For summer use sow as early as possible in spring, and at frequent intervals, during the season for succession.

SALSIFY, OR OYSTER PLANT

Package 10 Cents

German, Bocksbart; French, Salsifis; Spanish, Salsifi.

	Per oz.	¼-lb.	lb.
Long White French	\$0.25	\$0.75	\$2.75
Mammoth Sandwich Island25	.75	2.75

This very nutritious vegetable requires the same cultivation as Carrots or Parsnips. It is quite hardy and the roots may remain in the ground all winter; a quantity can be taken up and packed in earth or sand, and stored away for use when needed. It makes a fine soup, like the oyster. It is also half-boiled, grated fine, made into small balls, dipped into butter, and fried.

SQUASH

Package 5 Cents

German, Garten Kuerbise, French Courge; Spanish, Bueter

	Per oz.	¼-lb.
Mammoth Summer Crookneck. Twice size of Summer Crookneck	\$0.15	\$0.45
Early Golden Bush Scalloped. True bush growth producing fruit ready for use early in the summer15	.45
Early White Bush Scalloped. A white variety of the above15	.45
Summer Crookneck. Early, productive and of good quality.....	.15	.45
Boston Marrow. A very valuable medium early variety, an excellent keeper and of superior quality.....	.15	.35
Hubbard. The best Winter Squash, fine grained, dry, keeps well and is of excellent flavor20	.50
Mammoth Chili. Grows to a large size, often weighing two hundred pounds. Excellent for stock20	.50
Vegetable Marrow. A favorite English sort, skin greenish yellow, flesh white, soft and rich flavor15	.45
Italian (Cocozella di Napoli) grows 20 inches long with diameter of 3 or 4 in. Green or Marbled Yellow. See Varieties20	.50

SALSIFY

SQUASH—Continued.

Squashes are divided into two classes, Summer and Winter. The Summer varieties come into use about midsummer, and are eaten when the rind and flesh are young and tender. The Winter varieties are left on the vines until they are thoroughly ripe, gathered in the Fall, and stored away for Winter use. If well ripened and kept in a good cellar, they can be preserved until May. Prepare hill for the seeds by incorporating two or three shovelfuls of well rotted manure with the soil for each hill. For the bush varieties, from three to four feet each way, and for the running sorts from six to eight feet. Eight or ten seeds should be sown to each hill, thinning out after they have attained their rough leaves, leaving three or four of the strongest plants.

SWISS CHARD OR SILVER BEET

5 Cents Package

SWISS CHARD.

Silver Leaf. This is a Beet producing leaves only of a quality superior to those of the ordinary Beet, and excellent greens. Cultivate about the same as spinach, by sowing in early spring in drills about a foot apart. Oz., 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.25.

Giant Lucullus. Large, crinkled leaves; tender and of fine flavor; dark green; pure white ribs. Oz., 15c; $\frac{1}{4}$ lb., 35c; 1 lb., \$1.25.

TOBACCO

Package 10 Cents

Connecticut Seed Leaf. This variety is best adapted to the climate of the Northern and Middle States. Oz., 75c; $\frac{1}{4}$ lb., \$2.00.

Havana. Imported Seed, Vuelto de Abbajo. Per oz. 1.25; $\frac{1}{4}$ -lb. \$4.00.

TOMATO

10 Cents Package

German, Liebesapfel; French, Tomato; Spanish Tomata.

	Per oz.	$\frac{1}{4}$ -lb.
I. X. L.40	1.25
John Baer. Earliest tomato grown	\$0.40	\$1.25
June Pink. A very early market sort, smooth, medium size, bright pink.....	.45	1.50
Earliana, Extra Early. Bright red, smooth. It is claimed to be one of the earliest introduced, very productive.....	.35	1.20
Favorite. Large, smooth, productive, very solid and of fine flavor. A good shipper35	1.00
Chalks Early Jewel. Extra early, large, smooth.....	.40	1.20
Trucker's Favorite. Large, smooth and very regular in form, purplish red, solid35	1.20
Ponderosa. Very large and solid50	1.50
New Stone. Large and smooth40	1.30
Livingston's Perfection. Very early, round, smooth, tough skin, brilliant; solid and rich flavor; ripening thoroughly. A favorite market variety35	1.00
Livingston's Beauty. Large dark crimson, thick skin35	1.00
Dwarf Champion. Resembles Acme, early.....	.45	1.30
Acme. A beautiful variety. Fruit of medium size, form perfect and very smooth. Ripens all over and through at the same time. This variety seems to possess all the good qualities that can be desired in a tomato35	1.00
Matchless. Extra large, smooth and handsome; bright red; very solid. Plant of vigorous growth and prolific35	1.15
Bonny Best. Early tomato, large, smooth, uniform.....	.40	1.20

TOMATO—Continued

	Per oz.	¼-lb.
Golden Queen. A first class large, smooth, pure yellow Tomato. Fine bearer and of excellent flavor	\$0.35	\$0.60
Yellow Plum. Used principally for pickling.....	.50	
Red Pear Shape. Used principally for preserving and pickling50	
Red Currant for Preserves50	
Yellow Cherry. Similar to above, except in color50	

EARLIANA TOMATO

The seed should be sown in a hotbed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hotbed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set in the open ground, at a distance of three to four feet apart in hills in which a good shovelful of rotted manure has been mixed.

TURNIP

	Per oz.	¼-lb.	lb.
Milan. (Purple top), the earliest of all.....	\$0.15	\$0.35	\$1.25
Early White Flat Dutch. An early garden variety of medium variety size..	.10	.20	.75
Red Top Strap Leaf. This and the preceding are the best two kinds for Spring sowing and for garden culture.....	.10	.20	.75
Red Top White Globe. Very desirable, extensively grown for market10	.20	.75
White Egg. A new variety, beautifully shaped; excellent table turnip10	.20	.75
Yellow Globe. One of the best for general crop, either for table use or stock	.10	.25	.75
Yellow Stone. A good globe-shaped turnip, similar to the above10	.25	.75
Golden Ball. A table Turnip of quick growth, and unsurpassed quality10	.25	.75
Long White or Cow Horn. One of the best field Turnips, flesh fine grained	.15	.30	.90
Yellow Aberdeen. Hardy and productive, largely grown for farm purposes15	.30	.90
Large White Norfolk. Globe-shaped variety, one of the best for stock.....	.10	.25	.70
Pomeranium White Globe. Very fine, white Globe variety, round and thick	.10	.25	.70
Seven Top. Tops used for Greens.....	.10	.20	.70

TURNIPS—Continued

RUTA BAGAS

PURPLE TOP STRAP TURNIP

American Improved Purple Top. The leading variety, of fine quality, valuable both for the table and for feeding stock.

oz.	¼-lb.	lb.
.15	.25	.85

Carter's Imperial Royal Swede. An English variety, highly recommended as producing enormous crops.

.15	.25	.85
-----	-----	-----

White or Sweet German. A large solid variety.

.15	.25	.85
-----	-----	-----

Laing's Improved, Globe-Shaped, with small top and tap root.

.15	.25	.85
-----	-----	-----

For spring crop commence sowing early varieties as soon as the ground can be worked, in drills fourteen inches apart; thin out the plants to five or six inches apart. Keep clear from weeds, and when the bottoms begin to enlarge, brush away the earth from about the roots the depth of an inch or more and give them a light dressing, of wood ashes. This is the surest mode of obtaining fair and smooth Spring Turnips in old gardens where they are almost certain to grow wormy if the earth is allowed to remain in contact with the roots. It is important to get them started very early so that they may have time to grow a sufficient size before very hot weather, when they will soon become tough and strong. For the Fall and main crops, sow from the middle of July to the last of August in drills as directed for the Spring sowing. In the field, Turnips are more generally sown broadcast though much larger crops are obtained by drill culture.

SWEET POT AND MEDICAL HERB SEEDS

Herbs are valuable for culinary and medicinal purposes, but they do not always receive the attention which they deserve. They are easily grown, and when preserved by drying are ready for use at any season of the year. Sow in Spring as soon as the weather is warm, and thin out as the plants grow up.

	Per oz.	Pkg.
Anise (<i>Pimpinella anisum</i>), an annual, cultivated for its seeds and its leaves, which are used for garnishing and for seasoning.....	\$0.35	\$0.10
Balm (<i>Melissa officinalis</i>), a hardy perennial, used for making balm tea and balm wine35	.10
Basil, Sweet (<i>Ocimum basilicum</i>). This is a tender annual, cultivated for its leaves, which are much used for flavoring soups and sauces25	.10
Bene (<i>Sesamum orientale</i>)35	.10
Borage (<i>Borage officinalis</i>), hardy annual, sometimes used as a pot herb, and also for garnishing, but chiefly for claret cup and other cooling drinks. Bees are very partial to the flowers20	.10
Caraway (<i>Carum cavi</i>), hardy biennial, cultivated for its seeds, which are largely used in various kinds of confectionery and for giving flavor to liquors.....	.15	.10
Catnip (<i>Nepeta cataria</i>), perennial60	.15
Coriander (<i>Coriandrum salivum</i>), an annual, raised for its seeds, which are used by confectioners, and sometimes to disguise the taste of medicine15	.05
Dill (<i>Anethum graveolens</i>), annual, the leaves are used in soups and sauces, and the seeds are sometimes added to pickle cucumbers to heighten their flavor. Medicinally they are good for flatulence and colic in infants, ¼-lb. .5015	.10
Fenel (<i>Anethum foeniculum</i>), hardy perennial, leaves used for garnishing, and in the preparation of various fish sauces.....	.20	.10
Horehound (<i>Marrubium vulgare</i>), hardy perennial40	.15
Hyssop (<i>Hyssopus officinalis</i>), hardy perennial, the leafy tops and flowers are used for making hyssop tea25	10

SWEET POT AND MEDICINAL HERB SEEDS—Continued

	Per oz.	pk.
Lavender (<i>Lavandula spica</i>), a popular aromatic herb	\$0.75	\$0.10
Marjorum, Sweet (<i>Origanum Majorana</i>), for seasoning40	.10
Rosemary (<i>Rosmarinus officinalis</i>), an aromatic herb50	.10
Rue (<i>Ruta graveolens</i>), used for medicinal purposes, also frequently given to fowls for the roup60	.10
Sage (<i>Salvia officinalis</i>), much used for flavoring articles of cookery. It is also pos- sessed of medicinal virtues. Tea made from its leaves is a soporific; causing profuse perspiration, ¼-lb. \$3.00.....	.40	.10
Summer Savory (<i>Satureia hortensis</i>), annual. It has medicinal and culinary uses. Its aromatic leaves are much esteemed in salads and soups30	.10
Thyme, Broad Leaved English, hardy perennial. Thyme is used in various ways for soups, sauce and dressings, and a tea is made of the leaves which is a great remedy for nervous headaches70	.10
Tarragon Roots, each .50; lots of 10, 4.00.		
Tansy (<i>Tanacetum vulgare</i>)75	.10
Wormwood (<i>Antemesia abietnum</i>), used for medicinal purposes; it is also benefi- cial to poultry and should be planted in poultry grounds25	.10

Lawns like this can be produced by sowing Muzzy's Lawn Grass Seed.

ABOUT LAWNS AND LAWN GRASS SEED

FORMATION OF LAWNS FROM SEED.

There is nothing more attractive than a well kept lawn.

Many things are to be considered in connection with the making and proper care of lawns. A good lawn cannot be made in one season, success coming only through intelligent care for a period of years.

The ground should be thoroughly drained and well prepared. The soil ought not to be too rich, as a rapid growth is not wanted in the grasses of a lawn; but the surface should be as much alike in quality as possible and thoroughly pulverized. After sowing, the ground should be rolled and cross-rolled in order to press the seed firmly into the soil, and ten days or so thereafter a light application of Muzzy's Lawn Fertilizer mixed with an equal quantity of good loam or sand, will serve to stimulate the growth of the young grasses. The proper time to sow grass seed depends, of course, upon the latitude. In the central and eastern states from March 15 to the middle of May is the best time; but in favorable seasons the sowing may be done up to July 1. Seed may also be sown in the Fall, from the latter part of August to the end of September. The sowing should be done when the ground is moist, or before an expected rain, and a subsequent rolling is always advisable. As to weeds in newly-made lawns, it may be generally known that many weed seeds actually lie dormant in the ground for six or seven years and will germinate and make their appearance when the soil is turned up. The annual wild grasses, such as crab grass or Summer grass, must be pulled up by the roots before they ripen their seed in the Fall.

Rolling.—As soon as the frost is out of the ground in the Spring, the land should be gone over with a heavy roller. Winter frosts loosen the soil, and rolling is necessary to compress it again. Roll frequently.

Mowing.—All turf-forming grasses are improved, both in vigor of root-growth and in fineness of texture, by frequent mowings. It is impossible to say just how often the grass should be mown, as that depends upon the rate at which it grows. Too close cutting should be guarded against, however, especially during the hot Summer months, when the roots require some top-growth to protect them from the burning sun. A good top growth is also necessary to protect the roots from severe Winter frosts.

It is a good plan to sow on good land, in any out-of-the-way place, strips for sod to be used for patching poor parts of the lawn, or for grass borders, etc. The best mixture of seed for this purpose is *Cynosurus cristatus* (Crested Dog's-tail). Kentucky Blue Grass and Fancy Red Top.

MUZZY BROTHERS' CELEBRATED LAWN GRASS

	½lb.	1lb.	2lb.	5lb.	20lb.
Muzzy Bros.' Fine Mixed Lawn Grass. Composed of a mixture of the finest grasses; sow three bushels per acre ...	\$0.30	\$0.50	\$1.00	\$2.40	\$8.00
Muzzy Bros.' Special Lawn Mixture. This extra choice mixture contains a large proportion of the finer and more expensive species of grasses, in extra heavy samples, producing a turf of the closest and finest texture possible35	.65	1.20	3.00	10.00
Muzzy Bros.' Shady Lawn Mixture. A mixture of grasses that thrive in shady situations, under trees, or close to walls where there is little sun35	.65	1.20	3.00	10.00

QUANTITIES TO BE USED

- Plot 20 feet by 20 feet, sow 1 pound.
- Plot 25 feet by 100 feet, sow 6 pounds.
- Plot 25 feet by 50 feet, sow 3 pounds.
- Plot one acre, sow 80 pounds.

For large lawns, where turf has become bare through constant use, it is only necessary to sow fresh seed at the rate of one to two bushels to an acre. On such lawns it is well to use our Lawn Dressing, which can be raked in.

MUZZY BROS.' LAWN GRASS, TOP DRESSING, ODORLESS

QUANTITY REQUIRED OF OUR CELEBRATED LAWN DRESSING

Plot 20 feet by 25 feet, use 5 pounds.....	.50
Plot 20 feet by 50 feet, use 10 pounds.....	.80
Plot 25 feet by 100 feet, use 25 pounds.....	1.50
Plot 50 feet by 100 feet, use 50 pounds	2.90
Plot One-quarter acre, use 100 pounds	4.50

IN THE PREPARATION OF OUR LAWN GRASS WE USE THE GREATEST CARE IN THE GROWING OF THE SEED. ONLY THE HIGHEST IN GERMINATION AND PURITY IS USED.

The Proper Fertilizer For Lawns

SHEEP MANURE, spread about one ton to the acre, is an excellent dressing, and will not bring many weeds.

Sow Broadcast.

NITRATE OF SODA spread broadcast, about 200 pounds to the acre, will give immediate results, and is a good thing to use. For small places, and where it is preferable to make a solution of the nitrate, it can be easily done by putting one pound to fifty gallons of water, and then sprinkled on the grass. Nitrate should be spread broadcast only when a shower is expected, otherwise it is apt to burn the grass. Several light dressings of nitrate are preferable to one heavy one. You get much better results by applying in this way.

When the lawn is of Kentucky Blue Grass, a dressing of slacked lime can be given with advantage. Spread it in the fall after the ground is frozen.

GRASS SEED—Continued.

	Per 10 lbs.	1 lb.
Hard Fescue (<i>Festuca duriuscula</i>), admirable pasture grass of fine quality, thrives well in dry situations. 30 lbs. to the acre	\$6.50	\$0.70
Meadow Fescue (<i>Festuca pratensis</i>), this is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the greatest grasses for permanent pasture on a great variety of soils. 40 lbs. to the acre.....	3.00	.35
Sheep's Fescue (<i>Festuca ovina</i>), does well in high, dry and open pastures, is of short, dense growth, and valuable in lawn mixtures, 30 lbs to the acre.	7.00	.75
Meadow Foxtail (<i>Alopecurus pratensis</i>), regarded as one of the most desirable grasses for permanent pasture, being early and rapid growth. 25 lbs. to the acre.....	5.50	.60
Orchard Grass (<i>Dactylis glomerata</i>), is one of the most desirable of all pasture grasses, coming early in the Spring and remaining later in the Autumn than any other. 3 bu. to the acre. 14 lb. bu.	3.00	.35
Fancy Red Top Grass , cleaned like Timothy; free from chaff	3.50	.40
Rhode Island Bent Grass (<i>Agrostis Tennis</i>), best of all grasses for lawn where only one variety is used.....	Very scarce.	
Rye Grass English (<i>Lolium perenne</i>). Probably one of the most important and valuable of the cultivated grasses; is naturally adapted to almost any soil; matures early, and is very productive, but contains less nutrition than Orchard Grass.....	2.25	.25
Rye Grass Italian (<i>Lolium Italicum</i>). This ripens much sooner than the English Rye Grass, and is greatly preferred by cattle and greedily eaten by them, either in a green or dry state.....	2.50	.30
Sweet Vernal Grass (<i>Anthoxanthum odoratum</i>), is not valuable when sown alone, but when sown with other grasses, it becomes so because of its early growth. It also yields a delightful odor when cured for hay. 10 lbs. to the acre, mixed with other grass annuals	5.50	.60
Tall Meadow Oat Grass (<i>Avena Elatior</i>). As a crop to cut for hay, this is very desirable because of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick crop of aftermath, which also makes it valuable as a soiling crop. It has been lately in demand and is much valued in the South.....	4.50	.50
Timothy, Herd's Grass (<i>Phleum pratense</i>). As a crop to cut for hay, this is probably unsurpassed. It thrives best on moist, peaty or loamy soils, and is not suited to light or sandy soils, although on such it can with care, be made to produce fair crops. Price according to market, 45 lbs. to bu...	Market Price.	
Wood Meadow Grass (<i>Poa nemoralis</i>). This grass grows well both on shady and exposed situations. 30 lbs. to the acre	12.50	1.35
Tall Oat Grass (<i>Avena Edatior</i>), good for dry pastures and meadows. Is much relished by sheep.....	4.50	.50
Golden or German Millet . This variety is a heavier cropper than the Hungarian Grass, and needs a longer season and stiffer soil. Grows from three to five feet high, stands up well, is easily cured; gives general satisfaction. Three pecks to the acre. Per bushel of 48 lbs.	1.00	.20
Japanese Millet . This wonderful Millet yields possibly more fodder than any other forage plant that requires so little to sow an acre. Frequently as high as 12 tons of green food have been obtained from an acre. It is somewhat coarse in texture, growing sometimes as high as 8 feet; it is, however, ideal for silo or hay purposes. If sown early in May, it may be cut twice in one season. It branches out at the roots, and more than 12 lbs. per acre broadcast cannot be sown to advantage. Sow any time from May 1 to June 15.	1.00	.20
Hungarian Grass . A valuable forage plant, succeeds well on dry, light soil; withstands the drought remarkably, remaining green when all other vegetation is parched up, and if its development is arrested by dry weather, the least rain will restore it to vigor. Sow broadcast. Three pks. to the acre Per bushel of 48 lbs.	1.00	.15

Prices on above subject to market fluctuations without notice.

GRASS SEEDS

These Prices are Subject to Variation.

	Per 10 lbs.	Per lb.
Blue Grass Kentucky (<i>Poa pratensis</i>), extra clean; does well on light dry soils; recommended for permanent pasture; it requires two or three years to form a good sod, and does not arrive at its perfection as a pasture grass until it is much older; valuable in mixtures for lawn. 14 lb. bushel.....	4.50	.50
Blue Grass Canada. Little coarser than Kentucky	3.50	.40
Creeping Bent Grass, Florin (<i>Agrotis stolonifera</i>), used for lawns, well adapted to most places		2.00
Crested Dogtail (<i>Cynosurus cristatus</i>), good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns, 25 lbs. to the acre	6.00	.70
Soudan Grass. Valuable for Hog in sections of drought. Sow 25 lbs. to acre grow from 4 to 7 ft. Yield 2 to 5 tons to acre	100 lb., \$10.00; lb., 20c	

CLOVERS

(Subject to Variation in Price).

Red Clover. Medium (<i>Trifolium pratense</i>). Price variable, 60 lbs. to bushel.	Market Price
Red Clover, Large or Pea Vine. Price variable	
White Clover. (<i>Trifolium repens</i>)	
Alfalfa or Lucerne. Requires a deep rich soil, and in such will produce several crops every season. Fifteen pounds to the acre.....	
Alsike or Swedish (<i>Trifolium hybridum</i>). Ten pounds to the acre.....	
Crimson or Italian (<i>Trifolium incarnatum</i>), sown in Autumn, it furnishes an early fodder and is excellent for soiling. Twenty pounds to the acre. Price variable.....	
Bokhara Clover (<i>Melilotus alba</i>), affords excellent feed for bees; it is valuable soiling plant; lasts two years. Ten pounds to the acre.....	
Yellow Trefoil (<i>Medicago lupina</i>) Hop clover. Fifteen pounds to the acre.....	

MEADOW AND PASTURE MIXTURES

The formation of permanent and productive meadows and pastures is of great value to farmers, and has been given thorough study by numerous experts, resulting in formulas that will give good results under the varying conditions of our climate.

It is a well known fact that a heavier and more prolonged growth is produced by a mixture of many sorts of grasses than by only one or two. Some sorts do best on high, dry soil, while others prefer plenty of moisture. Some mature so early and others so late that there is no time in the season when one sort or another is not at its best. Grass seed may be sown either early in spring or fall, from September to the middle of October in this latitude. Below we give mixtures that we are confident will give good results.

MEADOW MIXTURE FOR ONE ACRE

No. 1. On Good Land,
Neither Too Dry nor Too Wet

Price \$12.00 for 40 lbs. Sow 40 lbs. to the acre

No. 2. For High and Dry Land.

Price \$12.00 for 40 lbs. Sow 40 lbs. to the acre

No. 3. On Wet Land

Price \$12.00 for 40 lbs. Sow 40 lbs. to the acre

PASTURE MIXTURE FOR ONE ACRE

No. 4. On Good Land.
Neither Too Wet nor Too Dry.

Price \$12.00 for 40 lbs. Sow 40 lbs. to the acre

No. 5. On Dry Land

Price \$12.00 for 40 lbs. Sow 40 lbs. to the acre

No. 6. On Wet Land

Price \$12.00 for 40 lbs. Sow 40 lbs. to the acre

GRAINS

All grains are selected expressly for seed, and are strictly pure and true to name.

Sold at Market Prices and Subject to Change.

SPRING WHEAT, 60 lb. Bushel.

Marquis Spring. This variety has been grown with great success for a number of years in Canada, and is very highly recommended, is bearded, yields well and the kernels are larger than those of other Spring varietiesMarket Price.

White Russian. This variety, recently introduced, has proved very valuable in many localities in the Northwestern States. Straw of good length, strong, does not lodge. It is not inclined to rust. Heads of large size and well filled with plump kernels weighing 60 to 63 lbs. to the bushel. Has produced 40 to 50 bushels to the acre..... Market Price.

WINTER WHEAT, 60 lb. bushel.

Red Man. Also known as the Seneca. This is a beardless white wheat. It proves early and hardy, has a stiff straw, yields larger crops than any otherMarket Price

Fultz. A beardless amber variety, grown largely in some sections of Pennsylvania and with very satisfactory results. It is very hardy and productive, and the straw is of medium length and very strong; makes excellent flourMarket Price

Red Mediterranean. (American). This is the imported variety fully acclimated and is a standard wheat. The heads are bearded and well filled. It succeeds well in nearly all localities and ripens earlyMarket Price

OATS, 32 lb. bushel.

SWEDISH. Very popular and standing well until fully ripe\$1.50 bus.

RYE, 56 lb. Bushel Spring \$4.00 bus. and Winter Rye, \$2.50 bus.

SPRING BARLEY, 48 lb. Bushel

Vermont Champion (two rowed), \$2.25 Bushel.

BUCKWHEAT, 48 lb. Bushel.

Silver Hull. This variety is a great improvement on the common Buckwheat. Sown at the same time it will continue to bloom longer, matures a few days sooner, and yields nearly or quite double under the same conditions.

JAPANESE BUCKWHEAT.

Yields twice or three times as much as Silver Hull and ripens a week earlier\$2.50 bus.

MISCELLANEOUS SEEDS, ETC.

Kaffir Corn or Sorghum	Per lb., 10c; 100 lbs., \$4.00
Essex Rape	Lb., 15c; 100 lbs., \$12.00
Cow Peas. For Fodder ..	Per pk., \$1.25; bu., \$4.00

General List of Flower Seeds

CULTIVATION OF FLOWER SEEDS

HARDY ANNUALS

Successive sowing may be made from March to the end of September; March, April and May are the best months for general Summer display; June and July for Autumn blooming, and August and September for Spring flowering. The soil should be carefully prepared by being finely pulverized and made light and rich.

Sow thinly; cover with a very thin coat of fine dry earth—the smallest seeds needing but a mere dusting to cover them—and from the first keep the plants thinned sufficiently to prevent overcrowding, which weakens them and produces poor blooms.

HALF HARDY AND TENDER ANNUALS.

These include some of the most beautiful and varied of our Summer flowers, among which may be mentioned Asters, Balsam, Ten Weeks Stocks, Phlox, Drummondii and Double Zinnia, which in form, size and brilliancy of flowers, and their great diversity of color, are now brought to a high state of perfection.

Sow from the beginning of March to June; when sown in March and early part of April, sow thinly in well-drained pots, pans or boxes; place in the greenhouse or a frame where there is a mild heat, or in the absence of these a sunny window in the house will do; cover the seeds lightly, press down the soil firmly and give a gentle watering with a fine rose watering pot.

Separate the plants when large enough to handle, and firmly plant out in May, as soon as the weather is sufficiently warm where intended to flower. The seed can be sown in the open ground in May and June.

HARDY BIENNIALS AND PERENNIALS.

These can be grown at all seasons of the year in the open garden without protection, and may therefore be placed among the most useful of our flowering plants their variety is almost endless, producing almost every form of flower and shade of color.

The seeds may be sown from May to October, but the best time is in May and June. Select for sowing a shady, moist situation, and in order to secure fine, strong plants, sow thinly, and as soon as large enough transplant in showery weather to nursery beds, and finally plant out in October and November, those sown in Autumn are best planted out in March or April, where intended to flower. Many Perennials, if sown early and treated as Annuals will flower the first season. The Pansy, Petunia, China Pink and its several splendid varieties, and many others do better as Annuals than Perennials.

ANNUALS FOR WINTER BLOOMING

Many Annuals are very desirable for the greenhouse for Winter blooming; these should be sown in July or August. The most important are Browallia, Candytuft, German Stocks, Lobelia, Mignonette, Schizanthus, Sweet Alyssum and Dwarf Nasturtiums. Many varieties as well as the above may be sown in the Fall and Winter for blooming early in the Spring, such as Acroclinium, Ageratum, Antirrhinum, Apple-scented Geranium, China Pinks, Dianthus, Mimulus, Myosotis, Pansy, Petunias, Phlox Drummondii, Salpiglossis, Salvia, Verbena Vinca and others.

Abbreviations and Signs used in the following list

- | | |
|---|---|
| <p>A. Annual, refers to those plants that last but one season and must be raised annually.</p> <p>B. Biennial, raised one year, bloom and die the next.</p> <p>P. Perennial, lasts two or more seasons.</p> <p>h. Hardy, as those that may be grown at all seasons in open air, without protection.</p> <p>hh. Half hardy, require the protection of a frame pit; or handlight till May, when they may be transferred to the open garden.</p> | <p>t. Tender, require to be raised and grown under glass, and will only do in the open air in July, August and September.</p> <p>cl. Climbing, as Cypress Vine, Morning Glory, etc.</p> <p>spr. Spreading or trailing as Verbena.</p> <p>g. Greenhouse, those plants which require to be grown under glass.</p> <p>s. Shrubs, plants of a shrubby or bushy habit.</p> |

HIGH GRADE FERTILIZERS

MUZZY BROS.' POTATO MANURE

The great satisfaction this Fertilizer has given our customers, being so universal, enables us to recommend it as the Leading Artificial Manure in the Market.

GUARANTEED ANALYSIS

Ammonia	4 per cent.	Ton (12 bags) \$55.00; per bag, (167 lbs.), \$5.50
Available Phos. Acid	6 per cent.	
Potash	10 per cent.	

BLACK HAWK MANURE

High grade general Fertilizer for all Crops.

GUARANTEED ANALYSIS

Ammonia	4 per cent.	Ton (12 bags), \$50.00; per bag, (167 lbs.), \$5.00
Available Phos. Acid.....	8 per cent.	
Potash	4 per cent.	

MUZZY BROS.' SPECIAL FERTILIZER

We recommend this fertilizer for a general line of crops, and consequently the trucker and market gardener is interested in buying that fertilizer which for the least cash outlay, will bring him the best returns; as it is no longer a question, but an actual fact, that from first class material, like our special Fertilizer, the purchaser will get the best results.

Equal to Ammonia.....	2 per cent.	Ton (12 bags), \$38.00; per bag (167 lbs.), \$4.00
Available Phos. Acid	8 per cent.	
Potash	2 per cent.

PURE PULVERIZED SHEEP MANURE

A pure, natural and nutritious manure. Immediate and lasting in effect. Excellent for mixing with soil of the greenhouse plants. In the vegetable garden it promotes a rapid, steady growth until maturity. It makes a rich Liquid Manure.

Quantity Required. For garden and field crops. 1 to 2 tons per acre—half before plowing, the balance before harrowing. For top dressing grass; use 1 ton per acre in fall or early spring			
25 lbs.	1.25	1 lb.10

HIGH GRADE FERTILIZERS—Continued.

ALPHANO HUMUS,
(Chemicalized)

Decayed vegetable matter for lawn, Rhododendron, bulbs, flowers, etc. Good top dressing for the spring.

Price, per ton.....\$25.00 Per 100 lbs. \$2.00

NITRATE OF SODA

A fertilizer for all crops. It is very quick in action, and hastens maturity of crops fully two weeks. Being extremely soluble, it should not be applied until the crops are above the ground when 100 pounds per acre should be sown mixed with wood ashes. Does not exhaust the land.

1 lb. bag	\$0.15	25 lb. bag	\$2.00
5 lb. bag60	50 lb. bag	3.50
10 lb. bag	1.00	100 lb. bag	5.00
200-lb. bag, \$9.50. 1 Ton, \$85.00.			

ACID PROSPHATE

14 to 16 per cent. Available Phosphoric Acid.

This is one of our Fertilizers which is used in the largest quantity in most of our mixtures as a base.

Per ton \$25.00 Per 200 lbs. \$3.50

Pulverized Limestone

These are high calcium limes and are adapted for use on all soils that require sweetening.

Most lawns and gardens require an application of lime in some form.

The Ground Limestone is recommended for top dressing lawns and for all farm crops.

Leguminous crops such as Alfalfa, Clover, Peas and Beans in particular require applications of lime.

Ground Limestone packed in 100 lb. sacks, price \$1.25; \$15.00 per ton.

Coleman Quick-Lite Lamp and Lanterns

Light With Matches—No Alcohol Torch Necessary

“The Sunshine of the Night”

Quick-Lite With Special Design OPAL SHADE

No. CQ329 is the standard model **Quick Lite Lamp**. It is equipped with a shade which has been especially designed for Quick-Lite Lamps. It is ornamental and a splendid value. With this lamp, shade-breakage is reduced to a minimum because the large-panel design of the shade and the weight and quality of glassware used produce uniform heat expansion.

One in carton complete with shade, mantles, pump, wrench, hanger, cleaning pick and extra generator. Shipping weight, 10 lbs. each \$8.50

Quick-Lite Lantern With Mica Chimney and Reflector

No. LQ327 **Quick-Lite Lantern** is the fastest selling lantern on the market.

It is wind proof, rain proof and bug proof. Guaranteed to keep right on shining in hundreds of places where a common oil lantern is useless. Made of brass, nickel plated. Same generator, same light, same cost to use as Quick-Lite Lamp.

One in carton complete with chimney, mantles, pump, wrench, cleaning pick and extra generator. Shipping weight 6 lbs.. Each \$7.50

QUICK-LITE ADVANTAGES

- BRILLIANT**—300 Candle Power, strong, pure, white light. Brighter than 20 old style lamps or lanterns.
- SAFE**—Can't spill fuel or explode even if tipped over. Can't be filled while lighted.
- CLEAN**—No greasy wick to trim. No dirty chimney to wash. No smoke. No soot. No odor.

- ECONOMICAL**—Cost to use less than half a cent per hour.
- CONVENIENT**—Make and burn their own gas—light with matches. Lamp holds 3 pints—burns 18 hours on one filling. Lantern holds quart—good for 12 hours per filling.
- DURABLE**—Made of brass, heavily nickel plated, and highly polished.

The Meeker Smoothing Harrow

"Helps Good Seeds Grow"

Prepares Any Soil for Planting

THE MEEKER HARROW is a perfect pulverizing and smoothing harrow and land roller combined.

As the illustration shows, it has four sets of rollers, equipped with 46, 58 or 82 discs, depending upon the size. These discs are set in alternating rows so that the entire surface is thoroughly worked. They grind up all lumps, leaving the soil fine and smooth. Even in damp soil, the alternating arrangement of the discs prevents clogging.

The board in the center serves as a leveler. It is set at an angle and can be adjusted up and down. It smooths down ridges and fills up the hollows.

Price 6 ft., 8 in. x 6 ft., with 8 discs, \$35.00

THE BOSS PLOW

This is the best one horse convertible Plow ever sold for the use of market gardeners and farmers generally. By changing the Moldboards and Shares that come with the Plow, the purchaser actually has four plows in one. Price complete\$9.98

No. 1½ Moldboard and Share makes a large one horse Plow.

No. 2½ Moldboard and Share making a medium sized one horse Plow, a cabbage Moldboard and Share making a complete Cabbage Plow, and by using the Plow without the moldboard with the small Share bolted to the standard, makes a superior Plow for working among cabbage, strawberries, etc.

Mitchell Potato Digger and Shovel Plow Combined, \$13.00

Price with wings only\$9.98
Potato Digger\$4.50

This implement should be in the hands of every practical farmer, doing its work easily and in the most perfect manner. By the changing of one bolt it may be converted into a Shovel Plow or Potato Digger. The fingers are adjustable, being held in position by the plow point. Thus in case of breakage, a new part may be inserted without the expense of a whole new head. The fingers, points and wings are of steel, rendering it light, strong and durable.

Darnell's Patent Furrower and Marker

In presenting the numerous merits of this invaluable little implement we would be glad to draw a comparison with another of its kind, but we have seen or heard of nothing but the ordinary scratch sleds which made a mere mark as a guide for the plow which follows, thus increasing the work instead of lessening it.

We have a genial ever-borrowing neighbor, however, with whom we might compare notes, and we will just bring him forward with his plow which he is inclined to think good enough yet. We think you will not fail to notice the difference.

We ride while he walks. We bring into requisition the services of our boy, if busy ourselves, while nothing short of a man, and a good one, too, can handle the plow.

We open two furrows while he opens one in clean ground, and do it better. 5 ft. 6 in. Price \$27.00.

Horse Hoe and Cultivator Combined

With Expanding Lever

Price Complete \$9.98

AQUAROID ROOFING

Planet Jr. Garden Tools

The New "PLANET JR." Catalogue is the handsomest, best and most instructive book ever issued on a similar subject. Full of little points that bring profit. Full of true and handsome illustrations. We mail it free to any address on application.

NO. 4 PLANET JR. COMBINED HILL AND DRILL SEEDER, WHEEL HOE CULTIVATOR AND PLOW.

Price, Complete, \$17.50. Weight, 50 lbs.
As a Seeder Only, \$14.00. Holds $2\frac{1}{2}$ qts. seed

This accurate, durable and easy-running tool sows all garden seeds from the smallest up to peas and beans in hills, 4, 6, 8, 12 or 24 inches apart, or in drills at the proper thickness and depth; rolling down and marking out the next row all at one passage. No time is lost. No seed is wasted. By removing the seeder parts and substituting the tool frame, you have a first-class single wheel hoe with a set of specially hardened steel tools, the best made for hoeing, plowing, cultivating, opening furrows, hilling, etc.

NO. 25 PLANET JR. COMBINED HILL AND DRILL SEEDER, DOUBLE AND SINGLE WHEEL HOE, CULTIVATOR AND PLOW.

Price \$21.50

Weight packed, 61 lbs. Holds $2\frac{1}{2}$ qts. of Seed

This combination is intended for gardeners who have a large enough acreage in crops for a double wheel hoe to be used to good advantage, and yet prefer not to buy seeders and wheel hoes separately; and for the family garden where a double wheel hoe is preferred.

As a seeder it is practically the same as the Planet Jr. No. 4, and as a wheel hoe has the same steel frames and cultivating attachments as the Planet Jr. No. 12 Double Wheel Hoe.

NO. 31 PLANET JR. COMBINED DRILL SEEDER AND SINGLE WHEEL HOE.

Price Complete \$12.00. Packed weight 30 lbs.

No. 31D. As a Drill Seeder Only, \$9.50.

Packed weight, 22 lbs.

This new combined tool is of great value to thousands of gardeners who have never felt able to own, either a seed drill or a wheel hoe. It will sow even a small packet of garden seed with great precision in a narrow row from $\frac{1}{4}$ to 2 inches deep. Quickly changed to a splendid wheel hoe. A special machine for the small gardener at a price he can afford to pay.

Planet Jr. Garden Tools

These Wheel Hoes are the highest type of their class. They have a great variety of attachments which adapt them to a large variety of work, and there is scarcely any garden cultivation they will not do.

NO. 3 PLANET JR. HILL AND DRILL SEEDER.

A favorite among onion growers, market gardeners and seedsmen.

The 15-inch driving wheel is steel, with heavy forged spokes, making the tool light and easy running.

The opening plow is V-shaped, adjustable for depth, leaving the seed in a very narrow line, making close cultivation easy. The index is in plain view at top of handles and graduated for hills or drills.

The flow of seed is instantly started or stopped by the cut-off rod. No seed wasted at end of rows. Sows in large or small quantities in drills or in hills, 4, 6, 8, 12, 24 inches apart. Force feed.

Holds 3 qts. of Seed. Weight packed, 43 lbs.
Price \$17.00.

NO. 12 COMBINED DOUBLE AND SINGLE WHEEL HOE, CULTIVATOR AND PLOW

Straddles crops till 20 inches high, then can be worked between rows with 1 or 2 wheels.

The hoes are wonderful weed killers and leave the ground almost level. The cultivator teeth are of improved design and admirable for deep work. The plows are invaluable for opening furrows for manure, etc.; for covering and for plowing to or from the crop.

Price, \$11.00

No. 12. 14-inch steel wheels. Steel frame.
Price, \$11.00. Weight, 33 lbs.

NO. 13 DOUBLE AND SINGLE WHEEL HOE.

Price, \$7.75. Weight, 28 lbs.

This tool is the No. 12, with 6-inch hoes only, these being the tools that are most used.

No. 16. Price \$8.75. Weight, 26 lbs.
Steel Frame. 15-inch Steel Wheel.

NO. 16 PLANET JR. SINGLE WHEEL HOE, CULTIVATOR, RAKE AND PLOW

\$8.75

Nos. 16, 17 and 18 have the same steel wheels, frames and handles, but the attachments sold with each vary.

The handles are adjustable in height. The frame is steel, convenient and strong with quick change device by which to exchange the tools without removing the nuts.

NO. 17 PLANET JR. SINGLE WHEEL HOE.

Price, \$7.25. Weight, 24 lbs.

No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work

NO. 18 SINGLE WHEEL HOE.

Price, \$5.50. Weight, 19 lbs.

This has one pair of 6-inch hoes only—the tools that are most constantly useful throughout the season.

Planet Jr. Tools

No other cultivating machine is so widely known as the Planet Jr. Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle.

Price \$16.50. Packed weight, 77 lbs.

NO. 7 PLANET JR. COMBINED HORSE HOE AND CULTIVATOR.

Steel Wheel.

Opens and closes furrows, hoes right up to the plants without danger of injury, throws dirt to or from the row and throws back from centre again. Adjusts for any width. The teeth, made of beveled steel, specially hardened, retain their cutting shape and outwear anything made. The steel wheel won't clog. The handles adjust up, down or sidewise.

NO. 9 PLANET JR. COMBINED HORSE HOE AND CULTIVATOR.

Weight packed, 70 lbs.

Price with Steel Wheel, \$15.00.

This Horse Hoe is identical with No. 7, except that it has a plain wheel instead of lever wheel. It has the high frame, patented hollow steel standards, steel wheel, patent lever expander, and hollow steel wheel arms.

This tool has become popular because of its strength and lightness, easy change of width, and while not so handy as a tool with a lever wheel, it is a favorite.

The New Steel Wheel, having no spokes, will not clog with corn stalks, stones or other trash, and little or no sand or dirt can be carried up on the inside of the rim to drop on the bearings.

PLANET JR. TWELVE-TOOTH HARROW, CULTIVATOR AND PULVERIZER.

No. 90, Complete, with Steel Wheels, \$17.00.
Weight packed, 74 lbs.

No. 90-B, Without Pulverizer, \$14.25.

No. 90-D, Without Pulverizer or Wheel, \$11.00

No. 91, with Steel Wheel, \$13.00.

Gardeners cultivate better than formerly and find it pays. The chisel-shaped teeth on this tool go as deep or shallow as you like, close to row, without injuring plants, cut out all weeds, stir the soil and mellow and fine it as with a garden rake. Any width from 12 to 32 inches. A special favorite with strawberry and tobacco growers, market gardeners, truckers and small fruit growers.

Planet Jr. No. 101

Price, \$10.75. Weight packed, 58 lbs.

This tool is somewhat lighter than our other cultivators and is offered with the object of filling a definite need where lands are light or where farming is done on a modest scale. Its weight adapts it particularly to use in light land, but it is strong enough for use everywhere, and is so simple in construction and has so few parts, it can't get out of order. The cultivator teeth are made of high carbon, beveled steel, and will retain their shape. The turning shovels are of special design, of elegant proportion and useful in connection with the shovel steel in throwing furrows, and afterwards covering them, and for plowing and hilling much or little as desired. Furnished as an extra, \$1.10 per set.

NO. 119 PLANET JR. GARDEN PLOW AND CULTIVATOR

This new member of the "Planet Jr." family will appeal to all those who prefer a high wheel tool for their garden work. Where the soil has not been so thoroughly and carefully prepared, the high wheel undoubtedly makes an easy running tool.

Price \$4.75

Firefly Plow - - \$3.75

WITH THE SCHOENER GARDEN TOOLS YOU CAN

**RAKE, HOE, PLOW, CULTIVATE, LIST, PULVERIZE,
MAKE SEED BEDS, COVER FURROWS**

With one strong handle and our three different hoe blades, and the adjustable all-purpose rake, you have a simple, practical garden tool for every need, which can be instantly changed for quickest and best results for the kind of work you have to do. And best of all, no more agonizing backaches, because

you can always work in the natural standing position.

By means of the Schoener patented adjustable socket the hoe blades and the rake can be quickly and firmly set at any angle desired: You can attach any of the four tools to the same handle in a few seconds. That is convenience and economy.

Until you actually use the Schoener Handy Garden Tools, you can't realize how much more easily your work is done by being able to set the blades in any position.

OHIO SPIKE TOOTH HARROW - 60 Teeth

The U-bars, channels, oscillating bars and teeth, are made of high carbon steel, precluding all possibility of bending. The channels, being placed at the ends of the U-bars, prevent them from catching on obstructions as is frequently the case with the open end harrow. Strong and well made but carrying no superfluous weight Corner braces, oscillating castings and lever castings of malleable iron. Made in one 30 tooth section, and with $\frac{5}{8}$ teeth, \$13.48, or in Two 30 tooth sections with $\frac{5}{8}$ teeth, \$25.00.

THE "ACME" DISC HARROW

The "ACME" Disc Harrow is a worthy new member of the famous "ACME" Tillage Line. It combines the best features of standard disc harrow construction with exclusive new features that lighten the draft and improve the quality of work performed. Note the offset gangs; they entirely do away with the middle ridge or "comb." Every inch of surface is cut over. The discs are of special shape, giving increased pulverization and a lighter draft. The end thrust on the gangs is received on ball bearings.

5 Prong Cultivator- Hoes and Weeders

are among the most modern
tools for garden and flowers.
They are light and strong
and cultivate closer to plants
without injuring them than
any other kind of imple-
ment, leaving the soil level,
loose and untrampled.

Cost but little more than
the common hoe—accomplish
much more and better work
with less labor. 75c

**Muzzy Brothers' House Paint**

These paints are manufactured by experienced and practical workmen from compounded materials of intrinsic value as pigments, which are thoroughly mixed and ground together by improved machinery, producing a paint possessing superior durability, covering capacity and uniformity of shade. We feel confident in stating that our Mixed Paints are cheaper to the consumer than white lead, because of their great spreading and covering capacity.

The colors are arranged on a card to show the most beautiful and durable shades for House Painting. In general, two tints or tones of the same color produce the best effect. The body color should generally be a light tint, but for larger residences, hotels, etc., a medium color for the body, with a light tint for trimmings, will create pleasing results.

\$3.50 per gallon.

Insecticides and Remedies for Plant Diseases

White Hellebore. An excellent remedy against currant worms, rose slugs, caterpillar, etc. Can be used either dry or in water; $\frac{1}{4}$ -lb., 15c; $\frac{1}{2}$ lb. 25c; 1-lb., 40c.

Fish Oil Soap. One of the most effective agents used for destroying scale bug, plant lice and all other insects injurious to vegetation.
Price, 1-lb. box, 30c.

Lime and Sulphur Solution. For San Jose scale, 1 gal. makes 15 by adding water. 1 qt., 40c; 1 gal. 90c; 5 gal. \$4.00; $\frac{1}{2}$ bbl. (30 gal.) @ 35c; 1 bbl. (50 gal.) @ 25c; gal. Dry—lb. @ 35c; 5 lb. @ 30c; 10 lb. @ 28c; 25 lb @ 25c.

CATTLE CONTENT. It is a thorough disinfectant and germicide. Protects horses and cows from the torture of flies. Price \$1.25 per gallon

ARSENATE OF LEAD
Paste

Its great advantages are that it adheres well to the foliage and spraying does not have to be repeated, as it does not readily wash off by rain. 1 lb., 40c

Dry
1 lb. 45c

MELROSINE made its great success as a positive remedy for Rose Bugs, for which it is, so far as we know, the only effective preparation. But of course, the less resistant insects succumb still more readily to its deadly powder, and therefore you have in

MELROSINE

The One Universal Contract Insecticide offering all the convenience and economy of having on hand one preparation to combat various sucking insects. It is effective for most species of Plant Lice, Black Flies, Green Flies, Soft Scale Insects, Rose Leaf Hoppers, Saw Flies, Japanese Bettles, Thrips, Red Spiders, Aster Bugs, Mealy Bugs, etc.

Price List of Melrosine.
Gallon Can ... \$6.00 Quart Can ... \$1.75
Half-Gallon Can 3.25 Pint Can 1.00
Trial Size 50c

BLACK-LEAF 40. A concentrated solution of nicotine sulphate; an excellent spray for black aphides and sucking insects of all kinds. Dilute one part to 900 or 1,000 parts of water, according to treatment. Full directions on each package, 1-oz. bottle 35 cts., ½-lb. tin \$1.25, 2 lbs., \$3.50, 10 lbs. \$13.50.

BORDEAUX-ARSENATE OF LEAD. A combination in proper proportions of the standard insecticide and fungicide remedies, thus killing insects and eliminating fungus plant diseases at one spraying and accomplishing the objects in half the time required to spray on separately. Dry, 1 lb., 40c; 5 lb., 38c.; 10 lb., 35c.

BORDEAUX MIXTURE OR FUNGIROID—For all fungous diseases, such as mildew and the various rots of the grade. Full directions on label. Paste, 1b., 35c; 5 lbs., 30c.; 10 lbs. 28c. Dry, 1 lb., 40c; 5 lbs. 35c; 10 lbs., 30c.

PYROX. The best and safest all-round spray for all insects, blights and fungus troubles. Kills Potato bugs. Sticks like paint. 1 lb., 45c; 5 lbs., \$1.75; 10 lbs., \$3.25; 25 lbs., \$7.48; 50 lbs., \$13.50; 100 lbs., \$22.00; 300 lbs., \$60.00.

CUT WORM FOOD—It is simple and easy to use. It consists of a material that is more delicious and is much more preferred by the CUTWORM than the plants themselves. It is sprinkled on the ground around the plant just as it is found in the package. Price 35c.

TREE TANGLEFOOT. A paste preparation for painting around the trunk of trees, in the form of a band. Caterpillars and other crawling pests cannot go over it. Lb., 50c; 3lb. can, \$1.45.

WEEDICIDE—Kills grass and weeds of every kind on roadways, gutters, tennis courts, etc., by one application. Price 40c qt.; \$1.25 gal.

GRAFTING WAX. A wax manufactured specially for grafting trees, bushes, shrubs, etc. ¼ pkg., 15c; ½ lb. pkg., 25c; 1 lb. pkg., 40c.

Per 100 lb. bag, \$1.75—Ton \$30.00.
Sulpho Tobacco Soap 10c & 20c.

THE AUTO No. 40 WHEEL SPRAYER

Applies, in a mist-like spray, all fluid insecticide and fungicide solutions on garden crops, ornamental plants, shrubs and low trees; also useful for whitewashing, applying sheep dip, fly oils, etc. It is a most convenient, large capacity, Auto Sprayer, fitted to a tubular iron frame with 20-inch wheel, so that it is as easily moved about as a wheel-barrow. The tank of heavy galvanized steel or brass (as may be selected) holds the spray solution and the compressed air pump with which the operator keeps up a continuous and uniform spray. The machine is furnished with 8 ft. of high pressure spray hose with connections in 8 ft. iron extension pipe with lever "shut-off" for tree spraying and the latest pattern Vermorel nozzle, which fits either the hose or pipe. Price, with 12 gal. galvanized steel tank, \$25.00.

LOWELL GRAND SPRAYER FOR LIQUID

DESCRIPTION.

Tapered cylinder reservoir, 4 inch bottom, 3 inch top, 1½ inch pump cylinder, 20 inches long. Plunger rod bright steel. Plunger our special make. Two brass solution or spray tubes. One inch zinc can screw for filling. Strong and durable in construction. Each sprayer is tested for leaks and perfect spray. Capacity of tank one quart. Aluminum finish. Galvanized Steel, 60c.

Lowell Baby Midget Sprayers for Liquids, 35c

BROWN'S CONTINUOUS SPRAYER

The Brown Continuous Sprayer, as the name implies is so constructed that it not only sprays on the downward stroke of plunger but also when it is drawn back, thus causing a continuous mist-like spray.

Brass \$1.25

Lowell—Galv.85

THE LOWELL FOUNTAIN COMPRESSED AIR SPRAYER

One pumping will expel entire contents of tank and is sufficient to spray 2,000 plants. Spraying nozzle may be reversed to spray under side of bushes and plants. Automatic Thumb Lever Valve is at all times under complete control of operator, hence none of the solution is wasted. It saves its cost in making a given amount of compound do so much more work. An Adjustable Shoulder Strap and Tree Attachment with suitable coupling for orchard and tree spraying, furnished with each machine. Aluminum finish. Capacity, 3 gallons. Price, Galvanized, \$6.48; Brass, \$8.48.

"LIGHTNING" WHITEWASH SPRAYER

This is the only Spray Pump that will properly spray whitewash without clogging. It is constructed of heavy galvanized iron, with brass tops and valves. Large air chambers and ball valves, the pressure maintaining a continuous stream or spray not affected by the upward stroke. Can also be used for washing windows, buggies and sprinkling lawns, flowers, etc.

AUTO SPRAY NO. 2.
All Brass Whitewash
General Purpose Spray-
er.

Price, \$5.50

Galvanized Iron, \$2.98; Brass \$4.25.

Price, \$15.00

PUMP NO. 25
FOR BARREL USE

Price \$13.98

BROWN'S AUTO SPRAY No. 1

The Auto-Spray No. 1 is the standard of all compressed air sprayers. It is the strongest and most simple in its working parts of any similar machine. Self operating. Two pumpings of a few strokes on the plunger will discharge the contents under high and constant pressure. After pumping, the operator has only to direct the spray.

Uses. For spraying trees, shrubs, vines, field crops, in the greenhouse, poultry house. For applying disinfectants and cattle-fly oils. Will handle all solutions, including whitewash and cold water paint.

Price, Galvanized, \$6.48.

Brass, \$9.48.

Milk Bottle Filler

Sensible \$10.00

It is sensible because it is simple, no levers, no springs, just a heavy tin tank made of I X X X X Cookley K Charcoal tin plates, holding 60 quarts, and with two faucets in the bottom. These re-

move any particles which may have remained in the milk, and cause the streams to flow in smooth, even columns.

We have built the Sensible so strong and heavy that it will last a life time. You can find no more sensible way to fill your bottles.

Dairymen's Cleaner and Cleanser for Milk Bottles

It is also a perfect sanitary cleanser for use in the home or on the farm, for washing dishes, glass, refrigerators, pots and pans, milking utensils, floors, baths, toilets, etc. 5 lb. 35c.

Milk Strainers

A LARGE ASSORTMENT

DAIRY AND MILKMEN'S SUPPLIES—Continued

R. & A. Unbound Sanitary Delivery Cases

Patented Nov. 7, 1905.

The weight of unbound cases is about three pounds less than bound cases, and for this reason they are preferred by many dealers. This style is made with or without bottom corner irons. Pressed galvanized steel stacking corner irons are always included.

A—Heavy stacking corner iron.

C—Bottom corner iron.

D—Galvanized steel support.

The bottles are always held in correct position to be filled and capped, as the galvanized steel support "D" keeps the long wires from sagging.

Galvanized Wire Netting

Poultry Netting

Our Poultry Netting is woven from the best quality of steel wire of full standard gauge. It is heavily galvanized after weaving, thus insuring the greatest durability.

Wire 2 inch Mesh, 1 ft., 2 ft., 2½ ft., 3 ft., 4 ft., 5 ft., 6 ft. No. 20 Wire 1 inch Mesh, 1 ft., 2 ft., 2½ ft., 3 ft., 4 ft., 5 ft. and 6 ft.

Market Prices.

Ornamental Fences and Gates

Our Ornamental Fences are exclusive in design, and embody many highly meritorious features not to be found in those of any other manufacture.

Our fabrics are made by cabling horizontal wires and inserting, at regular spaces, heavy upright or picket-wires which are corrugated either at intervals or continuously to engage the cabled line-wires, reversing the twist of the cable on each picket—thereby causing the cables to become firmly seated in the corrugations of the uprights, thus forming an immovable joint, and providing for contraction and expansion. Will not unravel when cut.

STYLE 600—SAME AS CUT ABOVE

Roll

8c per ft.	7c per ft.
------------	------------

A neat, artistic, and inexpensive fabric for the protection of flower beds. Also much used for lawn and curbside border. Can be readily taken up and used from year to year, cut off to length required, and the ends hooked together when set. No posts are required to hold it in place, as the picket ends are left projecting for insertion in the ground. Uprights are of No. 9 and cables of No. 13 heavily galvanized wire.

ORNAMENTAL WALK GATES

Cyclone Ornamental Gates are made to match any of our styles of fabric. Frames are of high grade steel tubing, with fittings of high-grade malleable iron and wrought steel. Same style as above we quote: Sizes, height from 26 in. to 42 in. width, 3 ft., \$4.00, plain \$3.50; 3½ ft., \$4.50, plain \$4.00.

HIGH GRADE POULTRY AND PIGEON SUPPLIES

Pratt's Baby Chick Food

For the "First Three Weeks"

Saves the little chicks—brings them through the first three weeks in fine shape—keeps them well and makes them grow fast. The most successful poultrymen all over the country testify that PRATTS BABY CHICK FOOD is the greatest money saver and chick saver that they have ever seen. If you want real success with your chicks—want to raise all that are hatched every time—use PRATTS BABY CHICK FOOD. Try it once and you will never be without it.

14 lb. Bags, \$1.10. Packages, 25c and 50c.

Full of Pep Dry Mash

Feed for the Growth Stage

A standard mixture of re-cleaned Cracked Grains, Seeds and Hulled Oats. The proportions are similar to the "Sun Brand," but a trifle coarser, especially to meet the requirements of the older chicks, although used by many from the beginning.

Prices on application.

Conkey's Buttermilk Food

Conkey's

THE ORIGINAL

Buttermilk Starting Feed

Saves Chicks

Feed it for the first 8 weeks, then follow with Conkey's Buttermilk Growing Mash and continue during the developing period. Then feed Conkey's Buttermilk Laying Mash

Price 25 lb. pkg.	1.50
Price 100 lb. pkg.	4.75

Developing Food

A special food for properly maturing young chicks after they are weaned from Chick Food up to the time for feeding scratching food and laying food. Developing food is dry grain and may be fed from hoppers, but better results may be had by scattering broadcast.

Scratch Food

For Grown Fowls
Suitable for all Seasons

A carefully selected mixed balanced ration of grains, cracked and whole seeds, etc., adapted to the vigorous growth of fowls and production of eggs. Scratching food should be scattered in the litter the first thing in the morning and at noon; late in the afternoon feed all the mash food they will clean up.

Prices on application.

Beef Scrap

Standard Meat Food for Poultry of all Ages

High Protein Beef Scraps is an especially valuable meat food for poultry and gives very satisfactory results. Any kind of Beef Scraps will not answer. Poor beef scours the birds and often injures them, when the first is used the results are uniformly good. Do not fail to buy your supply from a reliable source.

Prices on application.

Laying Food

Egg Mash

Invaluable as a Supplementary Feed for Winter Laying—15 per cent Meat Scraps and Oil Meal—16 to 18 per cent Protein. Can be "Dry" hopper fed or moistened.

Prices on application.

Spratt's Chick Grain

A specially prepared and highly nutritious food for young chicks.

Prices on application.

Muzzy "Pigeon Feed" a Squab Developer

Right feeding of pigeons is considered something of a problem. Most raisers do not understand either the pigeon or its feeding as well as they do poultry. The true fancier, the man who raises birds for their beauty, for the show, for the pleasure there is in it, or for sporting, finds in our Pigeon Feed a combination suited to his needs.

Prices on application.

Charcoal

Prepared expressly for poultry, absolutely pure, essential to health of fowls and aids to digestion. We carry three grades:

No. 2. Fine, for use on mash mixtures.
No. 1. Medium, for small chicks.
No. 0. Coarse, for fowls, 1 lb. 10c.
5 lbs., 40c. 10 lbs., 75c. 25 lbs., \$1.50
50 lbs., \$2.00 100 lbs., \$3.75

Ground Bone

Fine and Granulated.

Ground Bone is made from Dry Bone, and contains Phosphates, Lime and Protein and is especially valued as an egg producer.

Prices on application.

Cut Alfalfa Clover

A Poultry Food that aids digestion and assists in the assimilation of grain foods, thereby giving better results at lower cost. Among green foods, Alfalfa stands at the top. Meal-Ed Alfalfa is a boon to poultrymen. It is used in a mash for small chicks as well as to mature fowls. If more of this meal was fed to young chicks there would be less mortality.

Prices on application.

Cut Red Clover

Cut Clover has become the standard green food for winter egg production. It is used and recommended by every poultry expert and well-known practical poultryman in America.

Writers on poultry topics endorse it as a necessity, especially during the long winter months when the fowls are unable to obtain a substitute for the bulky green food which is so plentiful during the summer season in the shape of grass clover and vegetables.

Prices on application.

Crushed Oyster Shells

It is needless for us to enlarge on the value of oyster shells for poultry. Every poultryman realizes their importance as an egg maker and general promoter of good health.

1 lb., 5c; 5 lbs., 20c; 25 lbs., 60c; 100 lbs., \$1.00.
One ton \$18.00

Crystal Grit

We supply four sizes of grit. No. 4 for Brooder Chicks; No. 3 for Pigeons; No. 2 for half-grown Chicks; No. 1 for Hens, Turkeys, Ducks and Geese.

1 lb., 5c; 5 lbs., 20c; 25 lbs., 60c; 100 lbs., \$1.50

Foust's Health Grit

1 lb., 5c; 5 lbs., 20c; 10 lbs., 35c; 25 lbs., 75c; 100 lbs., \$2.00.

Seeds and Grains

We carry a full line of the following: Wheat, Barley, Millet, Hemp, Sunflower, Kaffer Corn, Canadian Peas, Cracked Rice, Linseed Meal, Canary Seed and Mixed Bird Seed, Buckweat, Rye, etc.

1-2-3 Poultry Feeder

For feeding Dry Mash, Scraps, Grit, Oyster Shells, Charcoal or any poultry feed. The separator can be arranged so as you can have one, two or three compartments. When used for two kinds put separator in one end; when for one kind of feed take out the separator; used for three kinds, say scraps, shells, and grit, put separator in the middle and you have three separate compartments. Price, \$1.50.

Reliable Standard Incubators

"Reliable Because Right"

All Standard Reliable Incubators have a chicken Nursery beneath Egg Tray where chicks can drop and keep out of the way of those hatching. All Standard Reliable Incubators have two glass doors.

All Standard Reliable Incubators have Double Heating System and can be run with one-third less oil than other makes. The Heaters are all encased so no cold air comes in contact with Heater. This saves waste of Heat.

If you want maximum hatching, healthy chicks, and greater profits, your choice will be a Reliable—the incubator that has made an unbeatable record at every Exhibit and Fair the world over where it has been shown.

Our Special Incubator

60 and 140 EGG Special

Our Special Incubator Compared With Standard Line

Our special line is made of the same grade material as our standard, has the same regulating, the same double heating device, the same ventilating and moisture system. Our Special has all the important points for hatching that are contained in the Standard. The differences between the Standard and the Special are, the Standard has two doors, the Special has one, the Standard has lamp incased, the Special has lamp on outside at end, the Standard has nursery beneath the egg tray, the Special has none. The Standard has two wood walls, the Special 140 Egg size has one wood wall and one wall of heavy fibre board, both the Standard and the Special have the same packing between the walls, except the 60 egg size has single wood case, the Standard is 18 inches deep, the Special 9 inches deep.

Chestnut hard coal is recommended for use in this Brooder, but soft coal may be satisfactorily used with our Four-inch Flue.

Here is another Colony Brooder improvement. A Screw Plate Draft is placed on the ash pit door, which permits draft to be opened as much as necessary for the proper combustion of soft coal. This draft is also helpful in starting a hard coal fire.

Another big feature on this brooder is that the regulators are equipped with two double disc thermostat wafers which are very durable and sensitive. This of course insures positive regulation of the check draft.

No. 9—Size of canopy, 42 inches; capacity 500 or less; height, 22 inches; diameter of cylinder, 10 inches; diameter of grate, 9 inches; price \$21.50.

No. 10.—Size of canopy, 52 inches; capacity 1,000 or less; height, 26 inches, diameter of cylinder, 13 inches; diameter of grate 11 inches, price \$26.50.

ALL COAL BROODERS SHIPPED COMPLETE READY TO SET UP AND OPERATE

THE "LAWN PARK" COOP SAVES THE CHICKS

It is made entirely from Galvanized materials, will not rust, and is proof against all chick enemies. The body of coop is made from strong 28 gauge Galvanized Steel, the Wire Park is made from heavy ½-inch mesh Galvanized Wire Screen. The "Lawn Park" is large and roomy, being 18 inches high and 24 inches long with park closed and 48 inches long with park extended. Price \$4.98.

high and 24 inches long with park closed and 48 inches long with park extended. Price \$4.98.

Pratts

POULTRY AND ANIMAL REGULATORS AND REMEDIES. BABY CHICK FOOD, WITH BUTTERMILK.

Healthy birds and lots of eggs, the two big things in poultry raising usually follow the use of

PRATTS POULTRY REGULATOR

Packages 25c, 50c and \$1.10.
25c-lb. Pails \$2.90.

100-lb. Drum \$10.00.
12-lb. Pails, \$1.65.

It builds up vitality, promotes sound digestion, sharpens appetite, thus helping to put birds into condition for heavy egg laying or winning blue ribbons.

Given to breeding stock it increases the fertility of eggs, strong in vitality, that will hatch chicks that will grow. Use it if you want big hatches of healthy chicks that will develop into husky pullets and cockerels.

It will help many of the common poultry ailments. It will greatly improve turkeys, geese, ducks, pigeons and guineas.

"Don't let ROUP cut your profits. The sure and easy "ounce of prevention" against this dangerously contagious disease is

Pratts Roup Tablets or Powder 25c and 50c.

Quickly absorbed by the blood, purifies the system, reduces fever, allays inflammation. The safe remedy for roup, colds, catarrh and many bad weather diseases.

Get rid of lice on your poultry, in nests, dust-baths, incubators and elsewhere by using

Pratts Powdered Lice Killer 12c and 25c

Effective, non-irritating. It quickly kills lice on little chicks, big chicks, setting hens and incubator chicks. It rids horses, cattle hogs, dogs and cats of lice, and destroys ticks on sheep. It destroys many insects and bugs on vines, plants and flowers. Drives out moths from closets, furniture, carpets and clothing.

When baby chicks come keep them healthy and growing and bring even the weak ones along by feeding

Pratts Baby Chick Food with Buttermilk

In Small Packages—Also 14, 25, 50 and
100-lb. Bags

A largely predigested baby food for baby chicks. Guaranteed to raise every livable chick. Helps Leg weakness, white diarrhoea, "pasting up" and other chick diseases.

More work out of your horses, more milk from your cows, fatter hogs—these are a few of the benefits which come from using

Pratts Animal Regulator

This is the original and pioneer stock regulator of America. Tested thoroughly for nearly half a century, its worth is known and recognized by stock owners the world over. Always sold on a guarantee that it will satisfy you or your money back.

25 lb. pails, \$3.40, are popular with our customers.

Packages, 25c, 50c, \$1.00.

Get prices on 50 lb. and 100 lb. sacks.

35c and 70c.

PRATTS Red Mite Special, 55c, 90c and \$1.50.

PRATTS Hog Tonic, packages, 50c and \$1.00.
100 lb. Bags \$8.25.

PRATTS Fly Chaser, 2 qt., 85c; 1 gal. \$1.25; 5
gal. cans, \$5.85; 10 gal. cans, \$11.30.

POULTRY MUSTARD

The experience of practical poultry raisers and the results of careful experiments conclusively demonstrate that Colburn's Poultry Mustard keeps fowls in vigorous condition, increases egg production, improves fertility and hatchability of the eggs, and does not injure the birds in any way.

DIRECTION FOR USING.—This Mustard may be fed in a dry mash or moist mash, as preferred. Give one heaping teaspoonful daily to each ten birds. This amount may be increased, especially during cold weather. Be sure to thoroughly mix the mustard with the ground grains.

Endorsed and recommended by leading poultrymen.

1½ lb. Boxes, \$60. 3 lb. Boxes, \$1.10. 5 lb. Boxes, \$1.75.

WOOD NEST EGGS

Highly enameled, unbreakable, lice-proof.
Very attractive appearance.

5c, 6 for 25c.

Lime Nest Eggs, 4c each, 7 for 25c.

No-Odor.—One of the best nest eggs to use.

PORCELAIN NEST EGGS.

These eggs are made of first class flint and do not break readily and will last indefinitely.

Price, 4c. each, 3 for 10c. Doz. 35c.

Whitewash Sprayer

This is the only spray pump that properly sprays whitewash without clogging. It is constructed of heavy galvanized iron with brass tops and valves. Large air chamber and ball valves, the pressure maintains a continuous stream or spray not affected by the upward stroke.

Galvanized Iron, \$2.48 Brass, \$4.25

Gape Worm Extractor

The use of this instrument is so simple that a few moments' practice will give almost all information needed. The wires being flexible, may be made smaller or larger by bending to suit any age fowl.

Full directions with each instrument.

Pilling French Poultry Killing Knife

Every Poultry raiser should have one of our killing knives. They are made of finely tempered instrument steel, with nicked handle; will last a life time. Don't wait! Send for it now. Price, 50c.

Reliable Spring Lever Poultry Punch

If you keep a record of your chicks, of the different breeds, hatches, strains, etc., there is no better, quicker, or easier way than by using our latest invention. Price, 25 cents.

Philadelphia Chick Marker

Price, 25 cents.

Incubator and Brooder Lamps

With seamless founts drawn in one piece and galvanized after drawing.

7-inch by $2\frac{3}{4}$, No. 2 burner and chimney.

7-inch by $2\frac{3}{4}$, No. 3 burner and chimney.

Zero Incubator and Brooder Lamp. Prices on Application.

Pilling Caponizing Sets.

The Farmer Mi Cap'niz'g Set	\$7
The Farmer's "	" \$4
The Philadelphia "	" 3.50
The Plain "	" 2.75

Full instruction for use with each set.

High Grade Tested Thermometers

The best incubator or brooder manufactured is worthless unless the thermometer used therein is accurate. Hundreds of hatches in incubators fail because of inferior thermometers, and large numbers of chickens are killed in brooders owing to defective or worthless thermometers.

The thermometers here listed are thoroughly tested before they are shipped.

Incubator Thermometer, each	.50
Brooder Thermometer, each	.50

Incubator Hygrometer

These Hygrometers should be used by every one who runs an incubator. They regulate the moisture as accurately as the heat which overcomes the trouble so many people have of chicks "dead in the shell."

Price each, \$1.50

Extra large size	8.00

Never Fail Oat Sprouter

HAS FIVE PERFORATED PANS, EACH 16x17
INCHES AND ONE DRIP PAN AT BOTTOM

The best device for producing quick, clean sprouted
oats

Possesses These Profitable Characteristics

No lamp is needed. It costs absolutely nothing to run it. Just sprinkle occasionally with water. Can be used in kitchen or basement where there is a fairly even temperature and light to produce growth.

No danger. Without lamp, stove or danger, muss or tuss.

Very durable. Frame of iron, heavily japanned. All pans have perforated bottoms except the lowest, Pans of seamless galvanized; can't get out of order, which catches the drippings.

Compact. Requires floor space only 18 inches square. Fits into almost any out-of-the-way place.

Green Food all winter if you use the Economy Oats Sprouter.
Price, \$5.98.

This Hopper Stands for Economy, Efficiency
and Reliability

Ideal for feeding Dry Mash, Beef Scrap, Bran, Meal, Grits, Oyster Shell, Hen-e-ta Granulated Milk, Charcoal, Cracked Bone, Whole Grains, etc. Guaranteed to give ten years of continuous service.

Hopper feeding is decidedly the easiest and most economical method of feeding birds that are being raised for breeding, for market or for egg production.

Sizes and Prices:

Small,	8 qt. size, for 10 to 15 birds,	\$1.75
Medium,	16 qt. size, for 15 to 30 birds	\$2.75

THE NORWICH AUTOMATIC AIR-LOCK FOUNTAIN

SANITARY NON-FREEZING

One filling of the oil tank will keep the apparatus burning day and night for two weeks, and it is but necessary to trim the wick occasionally, for the blaze is so small the wick crusting is a very slight matter. To accomplish the cleaning of the wick, the base is fitted with a slide, through which it may be attended without removing the reservoir, while the regulation for a high or low flame is accomplished from the outside of the burner by means of the wheel as shown.

Made in one size only—5 gallons capacity.

Price—Complete with Burner Base\$6.00
Without Burner Base\$4.00

Chip Paper Egg Boxes

Just the thing for your family egg trade, they ship knocked down can easily be set up.

Extra heavy, 1 doz. size, 15c dozen.

\$1.00 per 100; \$9.00 per 1,000

Round Baby Chick Feeder

Pure food for the baby chicks. A great feed saver, as the little chicks cannot get into it and contaminate the feed. Cannot be upset. Can also be used for water or milk. This is a practical, well-made feeding device that will last for years. Manufactured in two sizes.

Price 20c and 30c

Wire Chicken Nests

These nests are strongly made from heavy Japanned Steel Wire. They are intended to fasten to the wall with screw hooks, there is no room on them for lodgment of life, vermin of any kind, easy to keep clean and far superior to wooden boxes.

Price, each, 25c; per dozen, \$2.75.

Pigeon Nests

Should be used by every pigeon fancier. Made of clay, with heavy bottom to prevent upsetting. Size about 9 inches in diameter.

Price, 20c each.

Indurated Fibre

Fills a long felt want for all squab breeders. Wood gets filthy and vermin laden in a very short time.

Iron or earthenware is cold and bad for the birds.

35c each.

Mark each hen for her pen, so that you know where she belongs at a glance.

Mark your old hens to distinguish them from the pullets so that you can catch the right one to kill at the first grab.

Prices, Nos. 1, 2, 3, 4, 15c doz.; 25c for 25, 40c for 50, 75c for 100.

Pigeon and Chick, 10c doz., 20c for 25, 35c for 50, 50c for 100.

Sanitary Feed Troughs

Can be used for feed, wet mash or water. Barred top prevents wasting of feed and if used for water does away with the little chicks drowning. The feed saved by using this trough will more than pay for itself in a few weeks. Made of the best grade of galvanized iron in three sizes, namely:

No. 21—12 inches long each 45c
No. 22—18 inches long each 64c
No. 23—24 inches long each 89c

Plant Life Tobacco Dust

Most powerful insect and parasite Destroyer known. Guaranteed to kill insects, lice on flowers, plants, fruit trees, vegetables, human body, cats, fowls, earth worms, ants, also any house bugs or vermin. 20c per pound.

RAT CORN

Price 25c, 50c, \$1.00

DOG CAKES

Maltoid Milk Bone is a complete food in itself and is the only Perfect Food for all breeds, the quality of which is recognized by all Dogs through their keen sense of smell to the degree that they will leave any other Dog biscuits placed side by side. We stake our reputation with you on this.

The Bone Shape is tremendously attractive to the dogs. They will handle it exactly as a Bone, holding it between their paws, and they will gnaw at it, thus benefiting the teeth and gums, increasing the flow of saliva and aiding digestion. For these reasons it should be fed dry and unbroken.

Price, Dog Biscuits, 18c lb. Discount in large lots. Puppy Biscuits, 18c. lb.
